SUSTAINABILITY

Product Category Rule-style Specification for Life Cycle Assessment on Datacenter ICT-Equipment: Collaborative Progress & Draft Publication

Stephan Benecke *Head of Carbon Footprinting, Cloud Environmental & Social - Google*

Lisa Rivalin *Senior Staff Systems Engineer - Meta*

Ines Sousa *Sr. Sustainability Industry Advisor - Microsoft*

Vinny Ferrero *Sustainability Scientist, AWS Sustainability, S2I2 - AWS*

Chris Eckstein *Group Manager Life Cycle Modeling – Fraunhofer IZM*

Panel Discussion

Stephan Benecke

Head of Carbon Footprinting, Cloud Environmental & Social - Google

Lisa Rivalin

Senior Staff Systems Engineer, Hardware Design, Release to Production - Fleet Strategy Engineering- Meta

Ines Sousa

Sr. Sustainability Industry Advisor - Microsoft

Vinny Ferrero

Sustainability Scientist, AWS Sustainability, Science, Services, Infrastructure and Innovation (S2I2) - AWS

Chris Eckstein

Group Manager, Life Cycle Modeling - Fraunhofer IZM

OCP Spec for LCA on Datacenter ICT-Equipment

A rack-level main framework with commodity-specific requirements

- **Goal:** Establish a harmonized, actionable and application-case-driven approach for Product Carbon Footprint (PCF) calculations to support decarbonization of data center hardware.
- **Scope**: Rack-level cradle-to-gate assessment, including a common taxonomy, a novel data quality scoring system and commodity-specific modeling requirements.
- **Origin:** Launched in May 2025, driven by hyperscalers and aligned with LCA methodology development for notebooks and desktop computers.
- **Core Group:** Meta, Microsoft, AWS, Google, Fraunhofer IZM.
- **Status:** Draft OCP specification framework reviewed by OCP members. Commodity-specific sections reviewed by component manufacturers.

Call to Action: Supplier Engagement

Collaboration with suppliers is key for component level PCF assessments:

- **HDDs, PCB substrates, mechanical components, thermal management components, contract manufacturers**
- **Semiconductor manufacturers** highly important, covered through an activity of SEMI Semiconductor Climate Consortium aligned with this initiative

Timeline

- Q4 2026- Q1 2027: Continuation of the methodology assessment with commodities stakeholders
- Q1 2027: Public consultation (draft v0.3)
- Q2 2027: Publication of OCP Specification v1.0
