FROM DIRT TO TOKENS

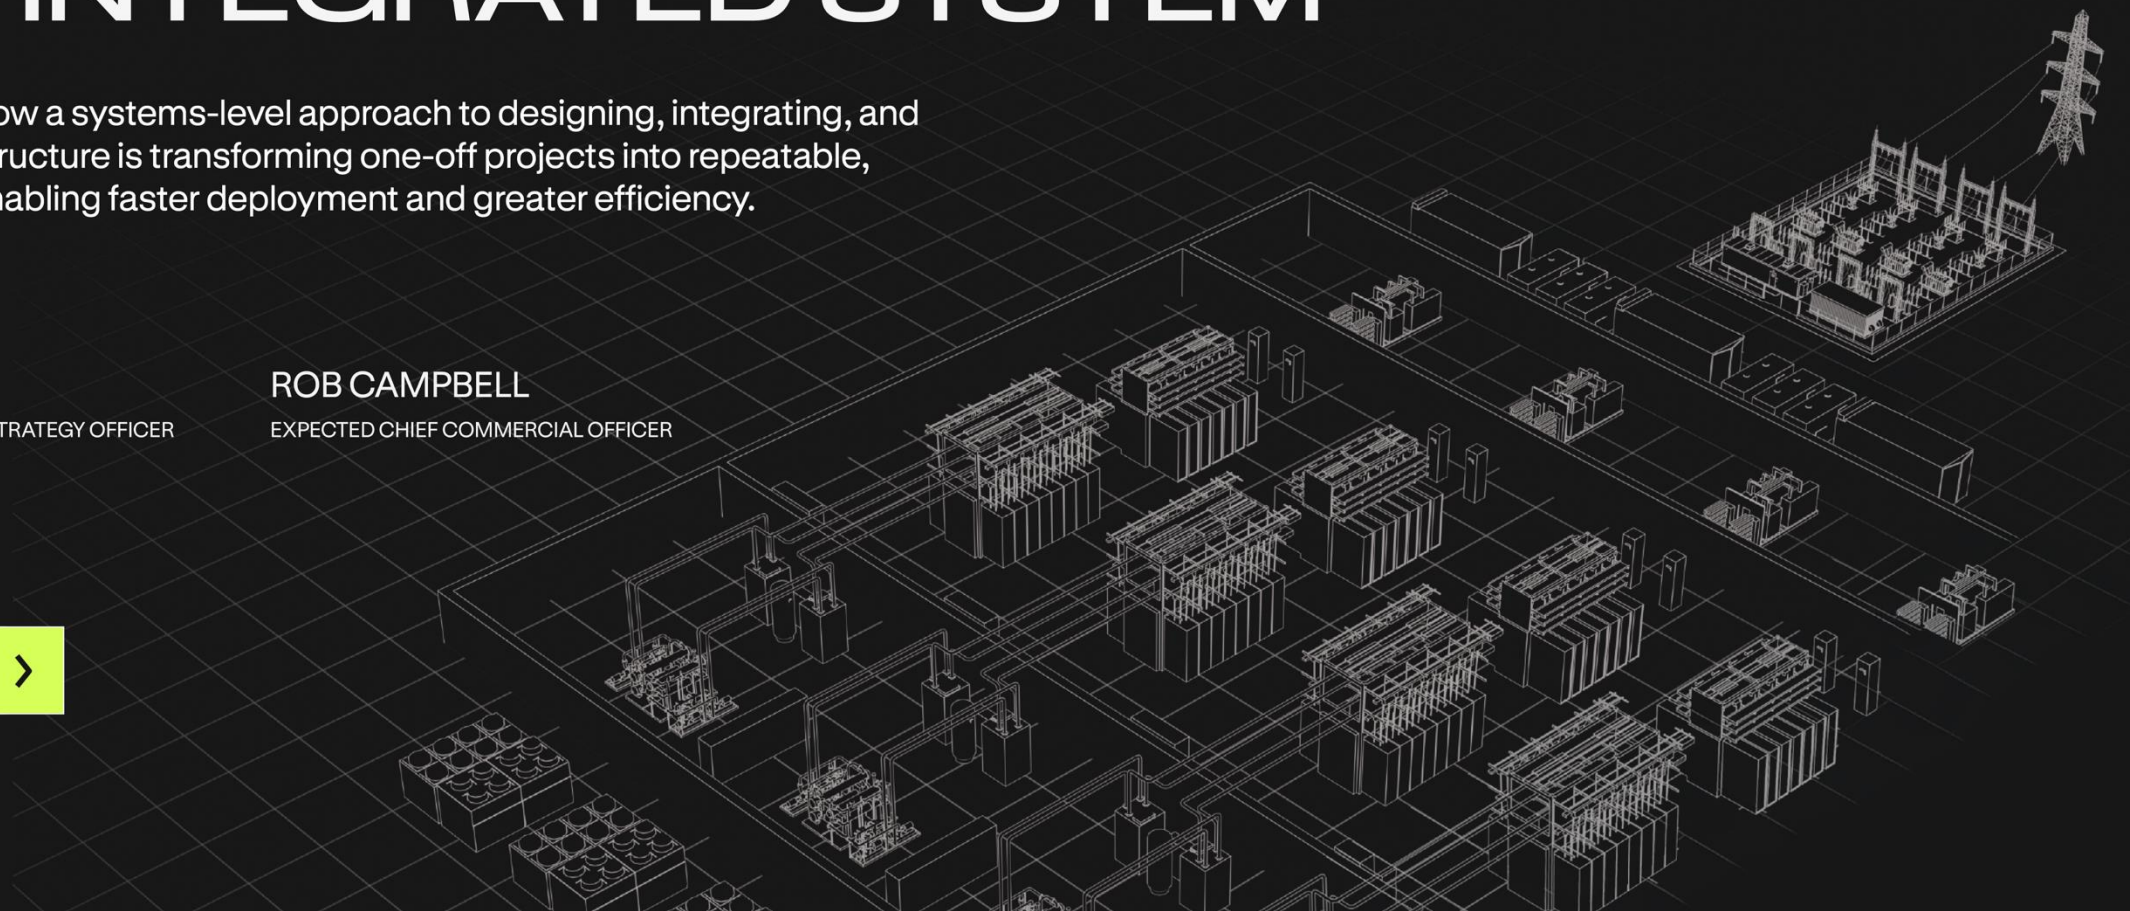

BUILDING AI INFRASTRUCTURE AS AN INTEGRATED SYSTEM

This session explores how a systems-level approach to designing, integrating, and manufacturing AI infrastructure is transforming one-off projects into repeatable, deployable products, enabling faster deployment and greater efficiency.

WHAT WE SAID LAST YEAR

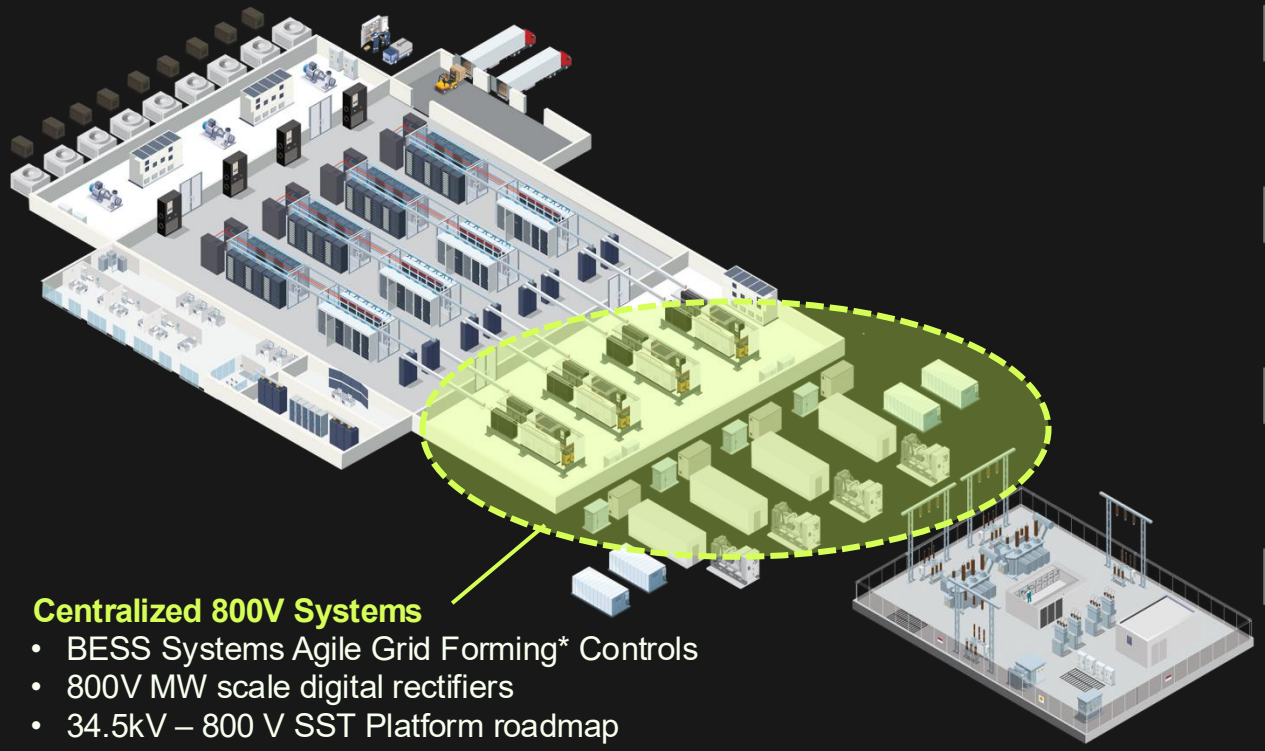

THE WALLS ARE STILL COMING DOWN…

UNIFIED SYSTEM DESIGN - CONVERGENCE

THESE BLOCKS ARE ONLY POSSIBLE NOW DUE TO RECENT ADVANCEMENTS IN 800VDC AND SYSTEM LEVEL DESIGN

Centralized 800V Systems

- BESS Systems Agile Grid Forming* Controls
- 800V MW scale digital rectifiers
- 34.5kV – 800 V SST Platform roadmap
- MV UPS

- Manage the entire DC at point of power coupling
- Modularization and prefabrication to accelerate deployment
- Thinking at a system level = thinking at a community level

800VDC ARCHITECTURE POWER ENABLES AI DATA CENTERS

ANSWER TO THE DEMAND FOR GREATER POWER EFFICIENCY

Flexible energy storage options for facility backup and smoothing of dynamic loads

Provides grid support with advanced grid-forming capabilities, load smoothing and compliance with new and emerging grid codes for data centers larger than 75 MW

Enables on-site generation with seamless integration of multiple sources including solar or fuel cells

Simplifies the power architecture by combining transformers, backup power/UPS, protective devices and 800 VDC power conversion into one integrated system

800 VDC Ready Platform with SiC based inverters, active digital rectifiers and defined SST roadmap enabling the highest level of efficiency for AI data centers

Modular Platform which can scale to 6 MW per system and provide redundancy

Provides clean 800 VDC power for modern GPUs with industry-leading system efficiency

WHY OUR COLD PLATES ARE DIFFERENT

SINGLE-PHASE DIRECT-TO-CHIP COLD PLATES SUPPORTING 3KW+ TDPS

DIVERSE COLD PLATE ARCHITECTURES FOR DIVERSE ACCELERATORS

MICROCONVECTIVE LIQUID COOLING

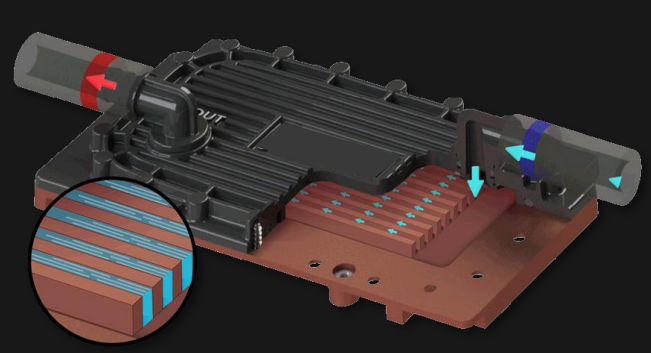

Microconvective cooling® uses jet arrays to precisely target processor hot spots.

- Reduces thermal gradients for improved temperature uniformity
- Minimizes pressure drop while supporting high flow rates

Best suited for: Custom accelerators, warm-water cooling environments, direct-to-die cooling

MICROCHANNEL LIQUID COOLING

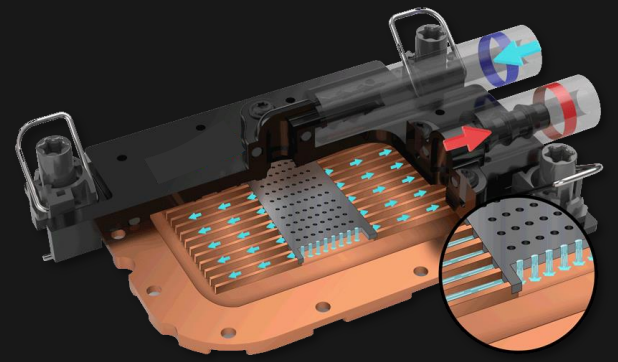

Microchannel cooling uses parallel internal channels for uniform cooling.

- Efficient cooling at low-to-moderate flow rates to reduce IT loop demands
- Optimized channel design enables faster development and deployment

Best suited for: Rapid deployments, enterprise and colocation compute

HYBRID LIQUID COOLING

Hybrid cooling combines jets & microchannels to balance heat transfer, flow & pressure drop.

- Fine-tuned control over thermal design, pressure drop, and system losses
- Engineered to handle elevated or uneven thermal demands in custom silicon

Best suited for: Custom silicon designs, mixed heat-flux profiles

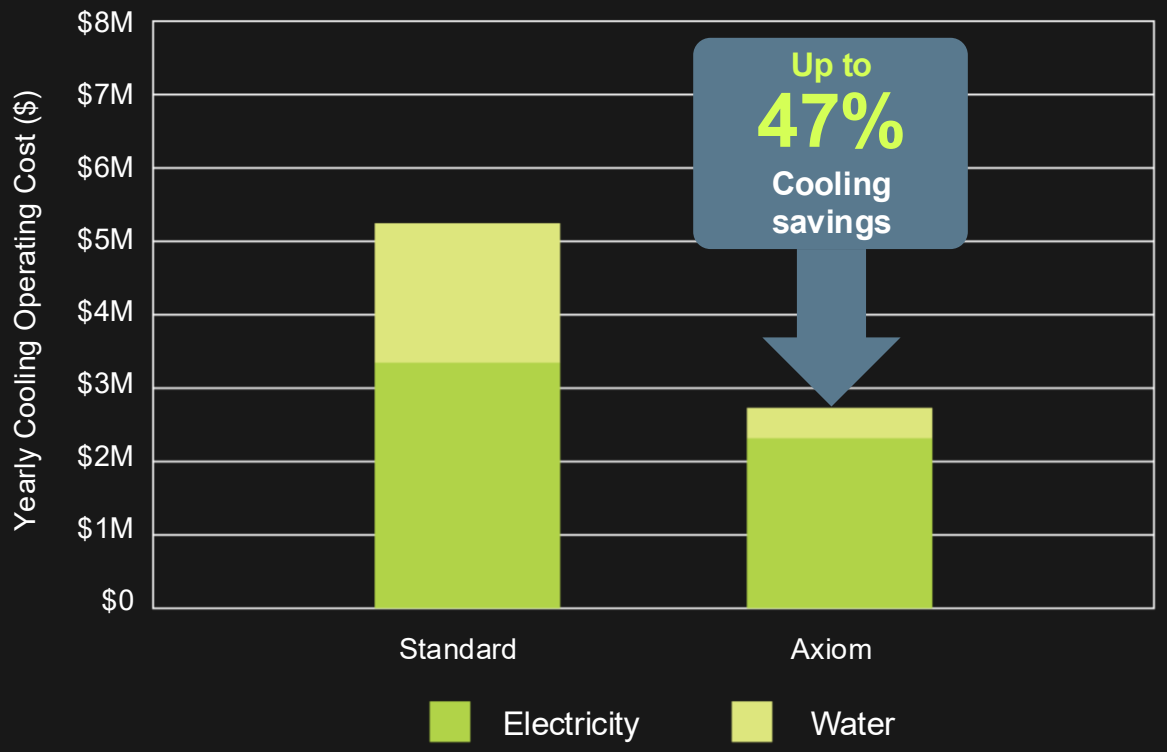

REAL IMPACT, REAL ROI

WHY COOLING CHOICES MATTER

The result: higher GPU utilization, lower operational costs, and greater sustainability for AI deployments.

LEGAL NOTICE

Some technologies and capabilities discussed are those of EPC Power Corp. ("EPC Power"). Flex's pending acquisition of EPC Power is expected to close in the fourth quarter of calendar year 2026, at which time EPC Power is expected to become part of Flex's Cloud and Power Infrastructure ("CPI") segment. Flex plans to separate CPI into Axiom, an independent publicly traded company, in the first calendar quarter of 2027. Items marked with an asterisk (*) are primarily EPC Power technologies and capabilities.

Cautionary Statement Regarding Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Words such as "anticipate," "believe," "expect," "intend," "may," "plan," "project," "will," and similar expressions identify forward-looking statements. These forward-looking statements include, without limitation, statements regarding the pending acquisition of EPC Power Corp. ("EPC Power") pursuant to that Stock Purchase Agreement (the "EPC Purchase Agreement") by and among Flex Ltd., ACS Acquisitions, Inc., EPC Power, and Charge Parent, LLC (the "EPC Power Acquisition"), the separation of Flex's Cloud and Power Infrastructure business into an independent publicly traded company, Axiom Solutions International, Inc. ("Axiom" and such separation, the "Spin-Off") and the Preferred Stock Investment Agreement, pursuant to which Flex, Axiom, GC Venture XIII (ASI), L.P. and other investors party thereto have agreed to collectively purchase 200,000 shares of Axiom's Series A Convertible Preferred Stock, par value $0.0001 per share (the "Convertible Preferred Stock"), in a private placement (the "Preferred Investment"); the expected timing of the closing of the Preferred Investment and the EPC Power Acquisition, the expected timing of the Spin-Off and the ability to complete each of the Preferred Investment, the EPC Power Acquisition and the Spin-Off; the anticipated synergies and benefits of the EPC Power Acquisition and the Spin-Off, including enhanced strategic focus, financial flexibility and value creation for shareholders; the expected tax-free treatment of the spin-off for U.S. federal income tax purposes; the expected future performance of each of Flex and Axiom, including the business of EPC Power; the impact of the EPC Power Acquisition on Flex's Cloud and Power Infrastructure business; the expected sources and structure of financing for the EPC Power Acquisition; and statements about business strategies, growth opportunities, market position and financial outlook for each of Flex and Axiom. These forward-looking statements are based on current expectations, estimates and assumptions involving risks and uncertainties that could cause actual outcomes and results to differ materially from those anticipated by these forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements.

Risks and uncertainties related to the Preferred Investment, EPC Power Acquisition and Spin-Off include, but are not limited to: uncertainties as to whether the Preferred Investment, the EPC Power Acquisition and the Spin-Off will be completed and the timing thereof; the ability to achieve anticipated ratings of the Convertible Preferred Stock; the possibility that various conditions to the completion of the Preferred Investment, EPC Power Acquisition and the Spin-Off may not be satisfied or waived, including the failure to obtain required regulatory approvals in the expected timeframe or at all or subject to conditions that are not anticipated; the possibility that the Spin-Off will not qualify for the expected tax-free treatment for U.S. federal income tax purposes; the risk that the Spin-Off may be more difficult, time-consuming, or costly than expected, including the impact on Flex resources, systems, procedures, and controls; the possibility that the occurrence of any event or circumstance that could give rise to the right of one or more parties to the EPC Purchase Agreement to terminate the EPC Purchase Agreement; potential adverse effects to the businesses of Flex or EPC Power during the pendency of the EPC Power Acquisition and the Spin-Off, such as employee departures or distraction of management from business operations; the possibility that the strategic, operational and financial benefits of the EPC Power Acquisition and the Spin-Off may not be achieved or may take longer to achieve than expected, including as a result of problems arising from the integration of the business of EPC Power; the failure to obtain, or delays in obtaining, required legal, regulatory or other approvals necessary to complete the EPC Power Acquisition and the Spin-Off; disruption from the EPC Power Acquisition and the Spin-Off, including potential adverse effects on relationships with customers, suppliers, employees and other business partners; competitive responses to the announcement or completion of the Spin-Off; diversion of management's attention from ongoing business operations; the possibility of disputes, litigation or unanticipated costs in connection with the EPC Power Acquisition and the Spin-Off; uncertainty regarding the financial performance of either company following the Spin-Off; negative effects of the announcement or pendency of the Preferred Investment, the EPC Power Acquisition and the Spin-Off on the market price of Flex's securities and/or on Flex's financial performance; the ability to achieve anticipated capital structures, credit ratings, and financing in connection with the Spin-Off; the ability to retain key personnel; impacts of geopolitical conflicts; and any changes in general economic and/or industry-specific conditions. Additional information concerning risks relating to our business is described under "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our most recent Annual Report on Form 10-K and in our subsequent filings with the Securities and Exchange Commission (the "SEC"). All forward-looking statements are made as of the date hereof, and Flex assumes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable law.

Important Information and Where to Find It

In connection with the proposed Spin-Off, Flex intends to file relevant materials with the SEC, including, among other filings, a proxy statement on Schedule 14A that will be mailed or otherwise disseminated to shareholders of Flex seeking their approval of the Spin-Off proposal. In addition, a registration statement on Form 10 (the "Form 10") has been filed with the SEC by Axiom with respect to its common stock on September 15, 2026. This communication is not a substitute for the proxy statement and Form 10 or any other document that may be filed with the SEC by Flex or Axiom. INVESTORS AND SECURITY HOLDERS ARE URGED TO READ THE PROXY STATEMENT, THE FORM 10 AND ANY OTHER RELEVANT DOCUMENTS THAT ARE FILED OR WILL BE FILED BY EACH OF FLEX AND AXIOM WITH THE SEC IN CONNECTION WITH THE PROPOSED SPIN-OFF (INCLUDING ANY AMENDMENTS OR SUPPLEMENTS THERETO) CAREFULLY AND IN THEIR ENTIRETY WHEN THEY BECOME AVAILABLE BECAUSE THEY CONTAIN OR WILL CONTAIN IMPORTANT INFORMATION ABOUT FLEX, AXIOM, THE PROPOSED SPIN-OFF AND RELATED MATTERS. Investors will be able to obtain free copies of the proxy statement and Form 10 and other relevant documents (when they become available) that will be filed by each of Flex and Axiom with the SEC on the SEC's website at http://www.sec.gov. Investors also will be able to obtain free copies of the proxy statement and other relevant documents that will be filed by Flex with the SEC from the investor relations page on Flex's website at investors.flex.com.

Participants in the Solicitation

Flex and certain of its directors and executive officers may be deemed to be participants in the solicitation of proxies from the shareholders of Flex in connection with the proposed Spin-Off. Information regarding Flex's directors and executive officers and their ownership of Flex ordinary shares is contained in Flex's proxy statement for its 2026 annual general meeting of shareholders, which was filed with the SEC on June 24, 2026, including under the headings "Corporate Governance," "Fiscal Year 2026 Non-Employee Directors' Compensation," "Proposal No. 1: Re-election of Directors," "Proposal No. 3: Non-Binding, Advisory Resolution on Executive Compensation," "Compensation Discussion and Analysis," "Executive Compensation," "Information about our Executive Officers" and "Security Ownership of Certain Beneficial Owners and Management." To the extent the holdings of the Flex securities by the Flex directors and executive officers have changed since the amounts set forth in the proxy statement for its 2026 annual general meeting of shareholders, such changes have been or will be reflected on Initial Statements of Beneficial Ownership on Form 3 or Statements of Beneficial Ownership on Form 4 filed with the SEC. More detailed information regarding the identity of potential participants, and their direct or indirect interests, by securities, holdings or otherwise, will be set forth in the proxy statement and other materials when they are filed with the SEC in connection with the proposed Spin-Off. You may obtain free copies of these documents using the sources indicated above.
