Infinite Demand

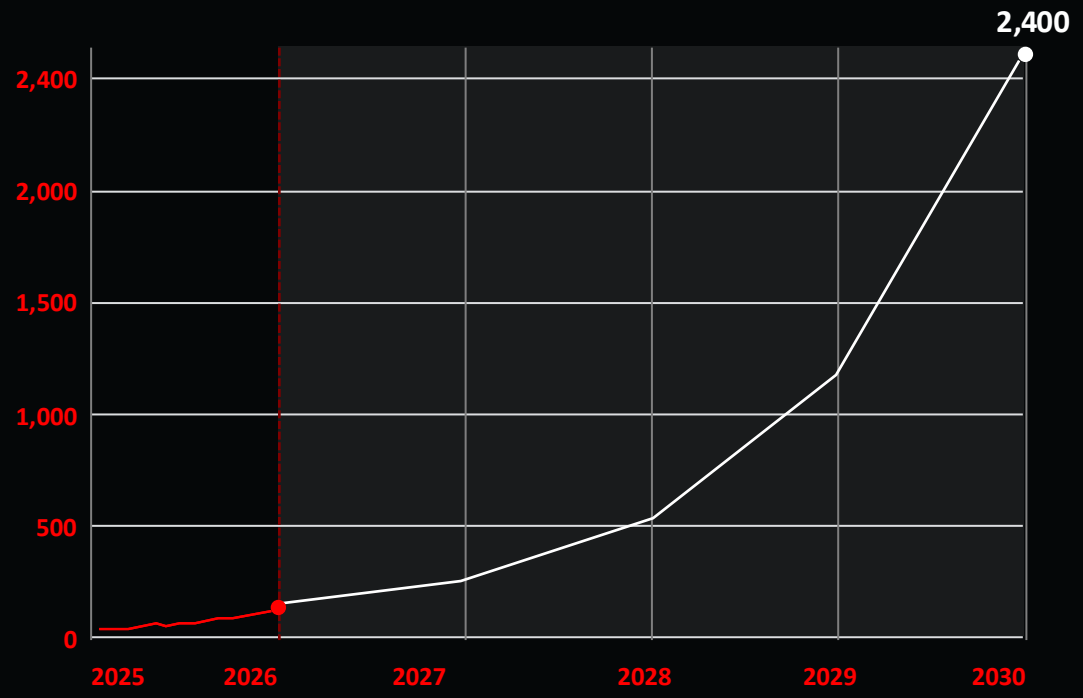

VS

Finite Resources

AI token usage: 24X growth forecast for 2026-2030

OPENROUTER | HISTORY GOLDMAN SACHS | GLOBAL OUTLOOK

OpenRouter platform history in red; Goldman Sachs global outlook in white

24X

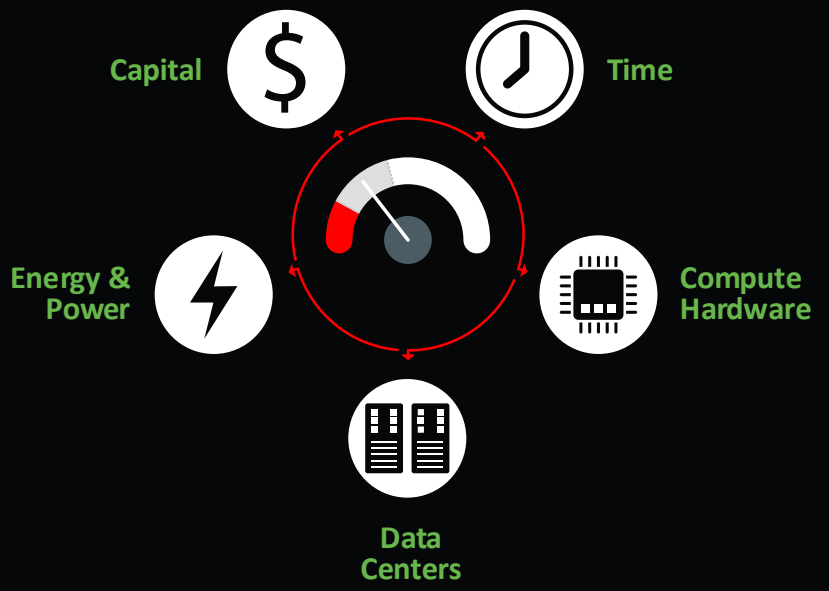

2026 → 2030

120Q

Tokens per month
2030 Global Forecast

Different coverage: Platform traffic vs Global Consumption,
Both source anchors are normalized to 100; absolute volumes are not spliced

The Physical Limits of AI

Sources: OpenRouter, State of AI (Dec. 2025) Goldman Sachs Research (May 20, 2025

Method: OpenRouter selected weekly values approximated from its chart, last observation Nov. 24, 2025 = 100 Goldman 2026 = 100; 2030= 2,400

White path is constant-growth interpretation, not published annual forecasts.

Why Memory-Centric Compute Matters

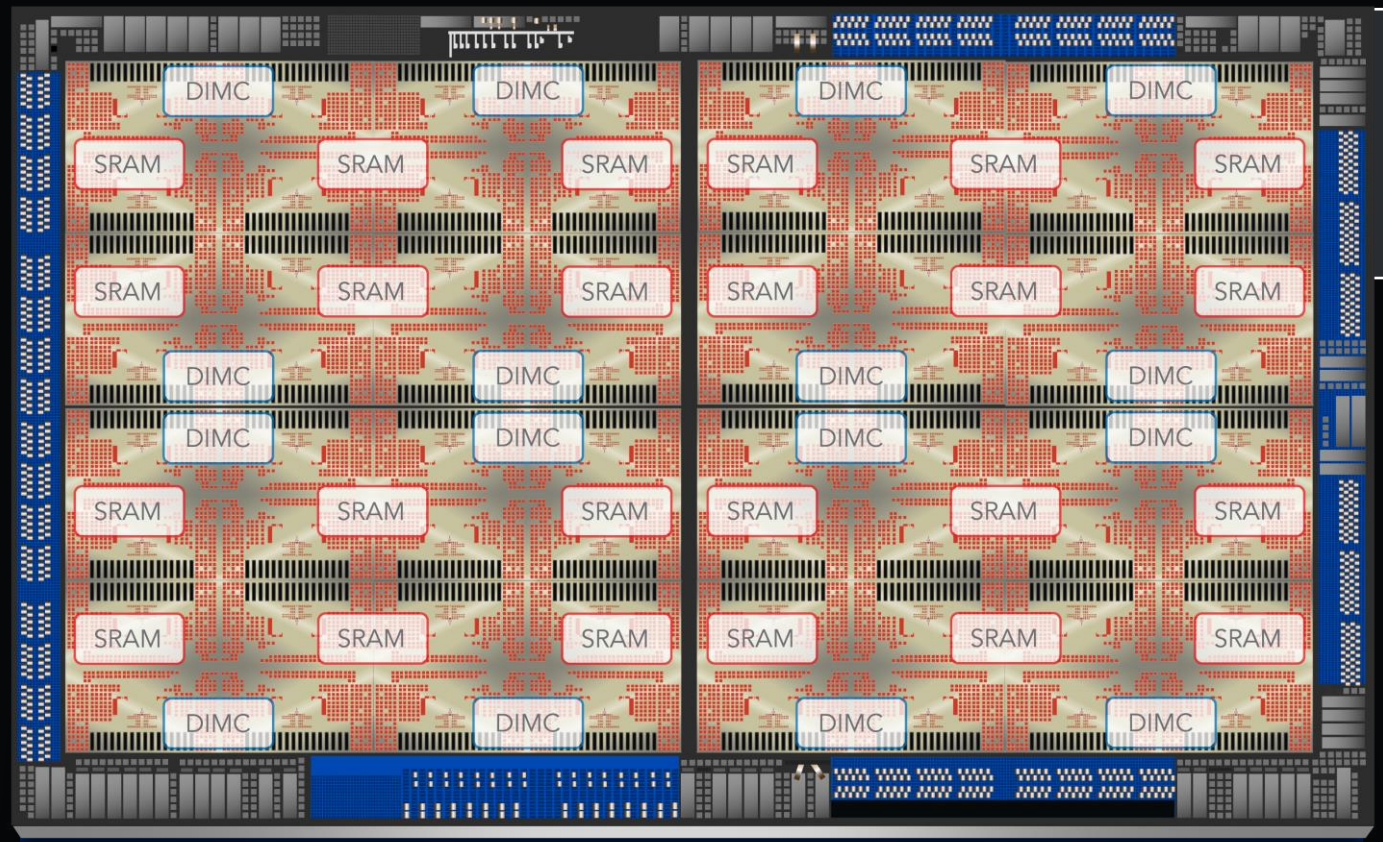

A Physics Problem at the Core

d-Matrix Inc © 2026. All Rights Reserved.

Memory-Centric Compute by Design - SRAM

d-Matrix Corsair: World's First SRAM Solution to Market

SRAM approach integrates memory with compute

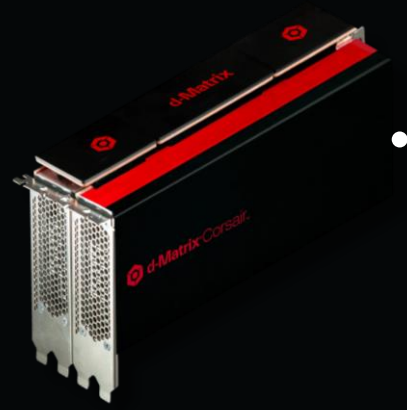

CORSAIR
1 Chiplet
4 Quads
256 MB SRAM

Announcing General Availability

d-Matrix Corsair Rack-Scale Platform

d-Matrix Corsair™

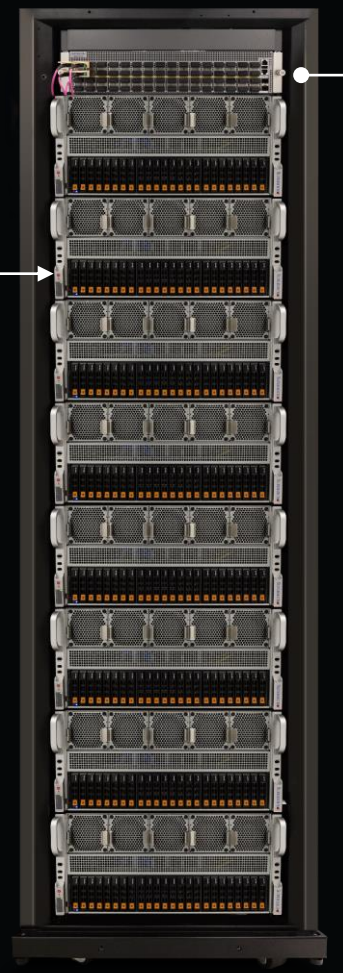

Corsair™ Server

d-Matrix JetStream™

400G Ethernet Switch

Corsair SquadRack™

IN PARTNERSHIP WITH

ARISTA | BROADCOM | SUPERMICRO

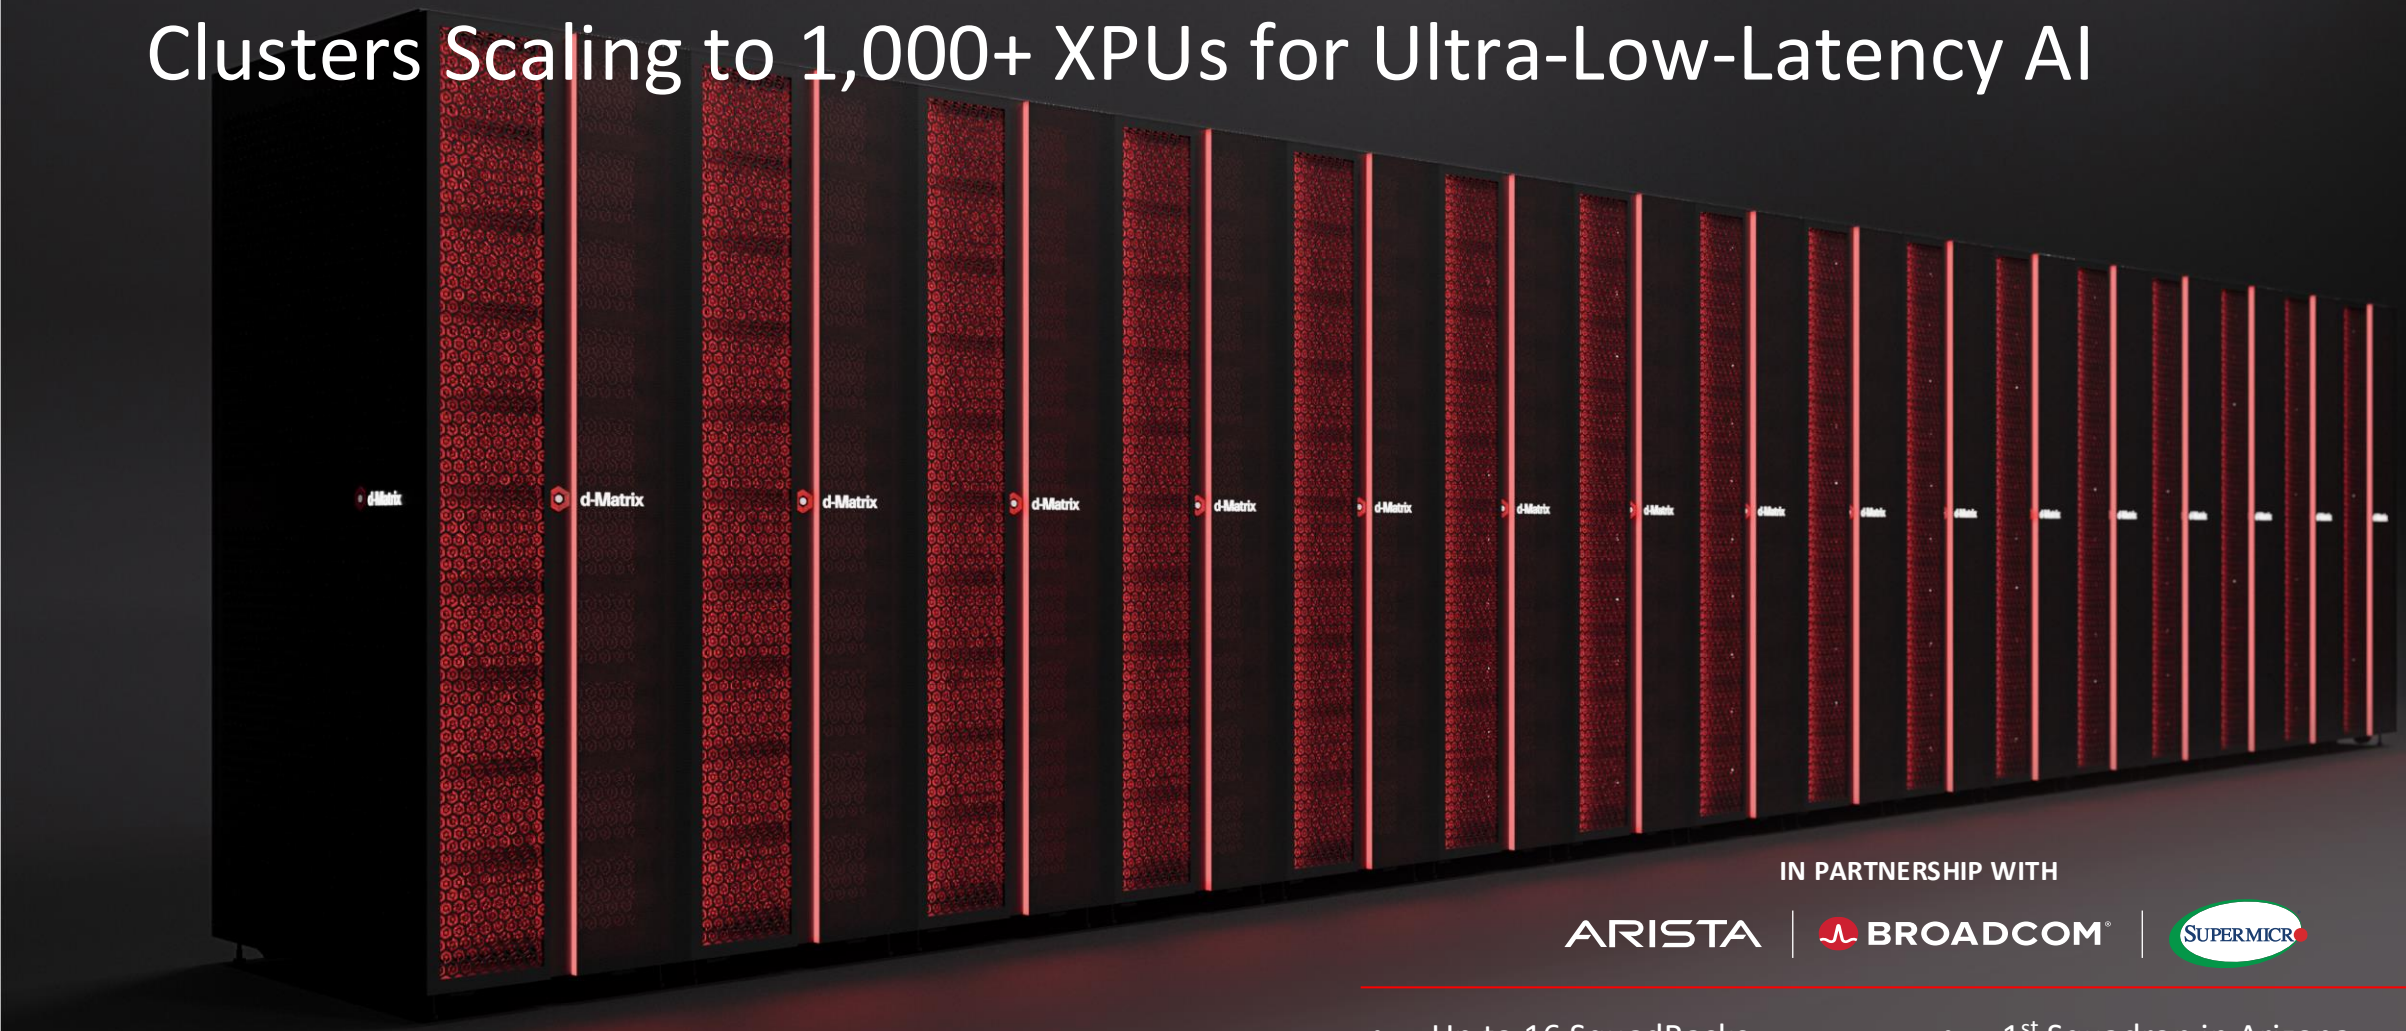

d-Matrix Inc © 2026. All Rights Reserved.

d-Matrix Inc © 2026. All Rights Reserved.

Announcing d-Matrix Squadron

Clusters Scaling to 1,000+ XPUs for Ultra-Low-Latency AI

IN PARTNERSHIP WITH

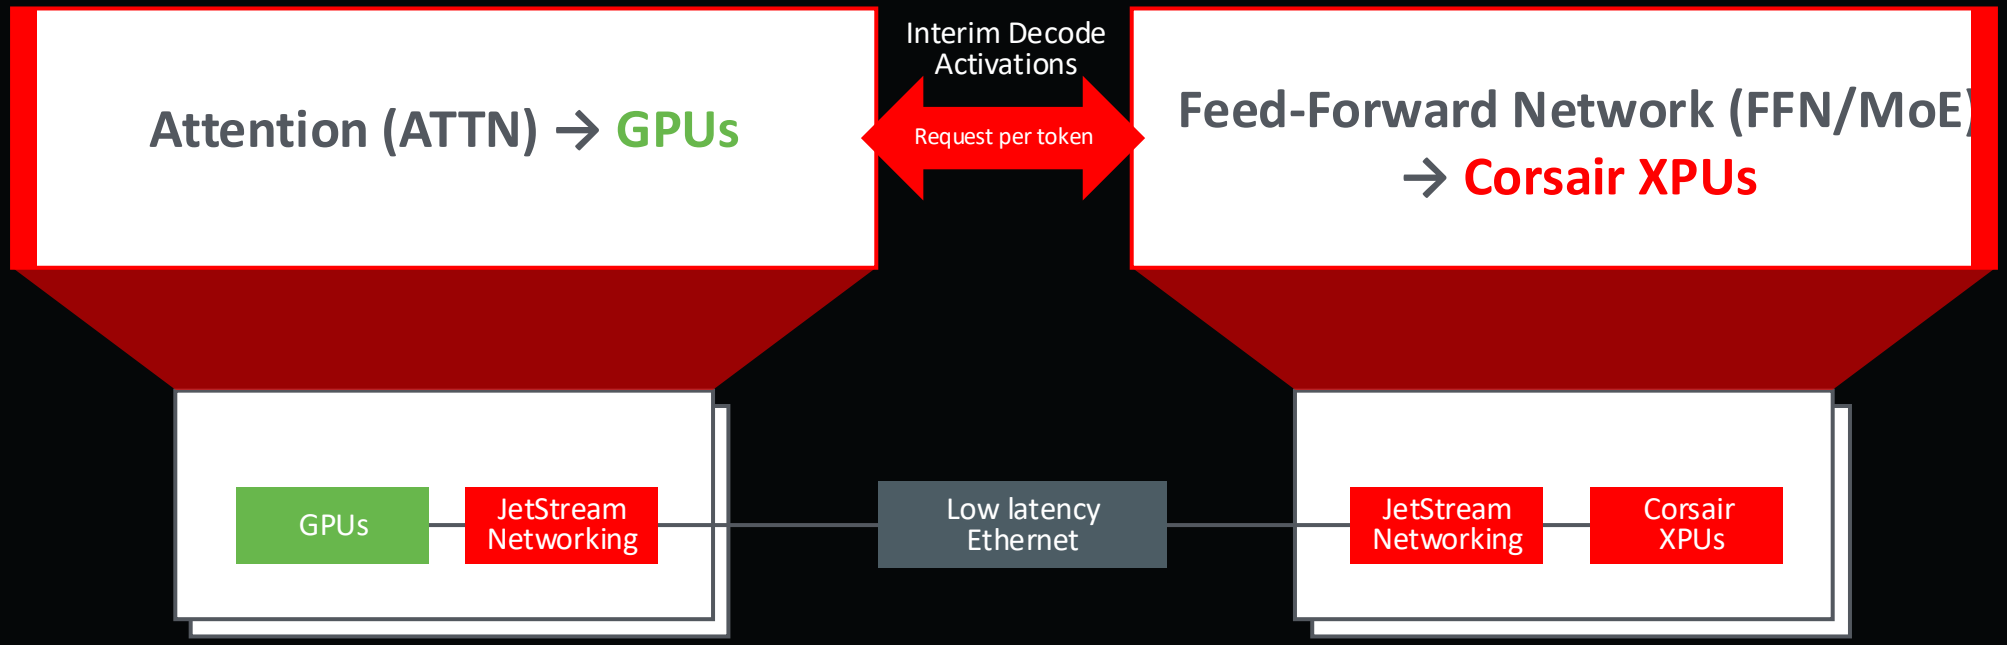

ARISTA | BROADCOM | SUPERMICRO

- Up to 16 SquadRacks
- Scales to 1,024 Corsair XPUs
- Megawatt-level compute
- 1st Squadron in Arizona for internal R&D
- Available now

d-Matrix Inc © 2026. All Rights Reserved.

Industry's First AFD Demonstration

d-Matrix Proves Viability of Attention-FFN Disaggregation

845 tokens per second per user
64 concurrent users = **20,145** tokens/second

What’s coming Next?

d-Matrix Inc © 2026. All Rights Reserved.

Memory-Centric Compute by Design – 3D DRAM

d-Matrix Raptor: World's First 3D-Stacked Solution to Market

d-Matrix Inc © 2026. All Rights Reserved.

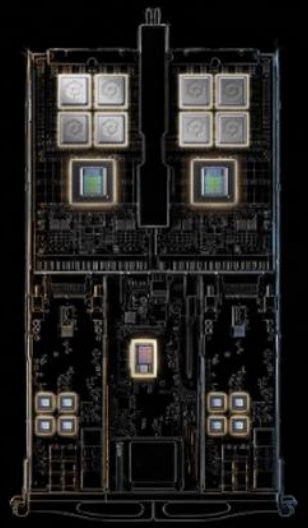

d-Matrix Partners with NVIDIA on NVLink Fusion

144 Raptor XPUs to Plug into NVIDIA MGX Oberon Rack Architecture

d-Matrix | NVIDIA

NVLink Fusion to connect next-generation d-Matrix XPUs to NVIDIA AI platform

Includes NVIDIA Vera, Connect X-9, BlueField-4 DPU and Spectrum-X Ethernet

d-Matrix Raptor Compute Tray

NVIDIA NVLink Switch Tray

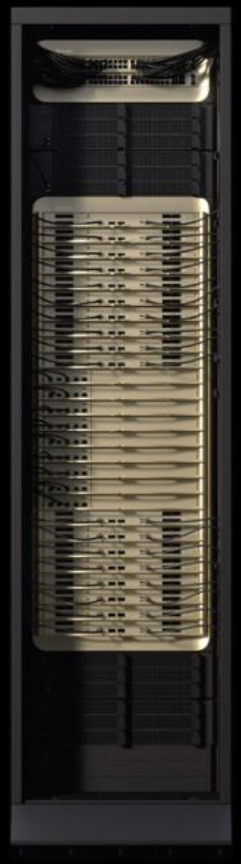

d-Matrix MGX rack with NVLink Fusion

d-Matrix Inc © 2025. All Rights Reserved.

d-Matrix Raptor NVLink Fusion Rack

Data Center Scale Ultra-Low-Latency Inference

→ 18 Raptor trays

→ 9 NVLink Switch trays

Rack Specifications

144 Raptor XPUs

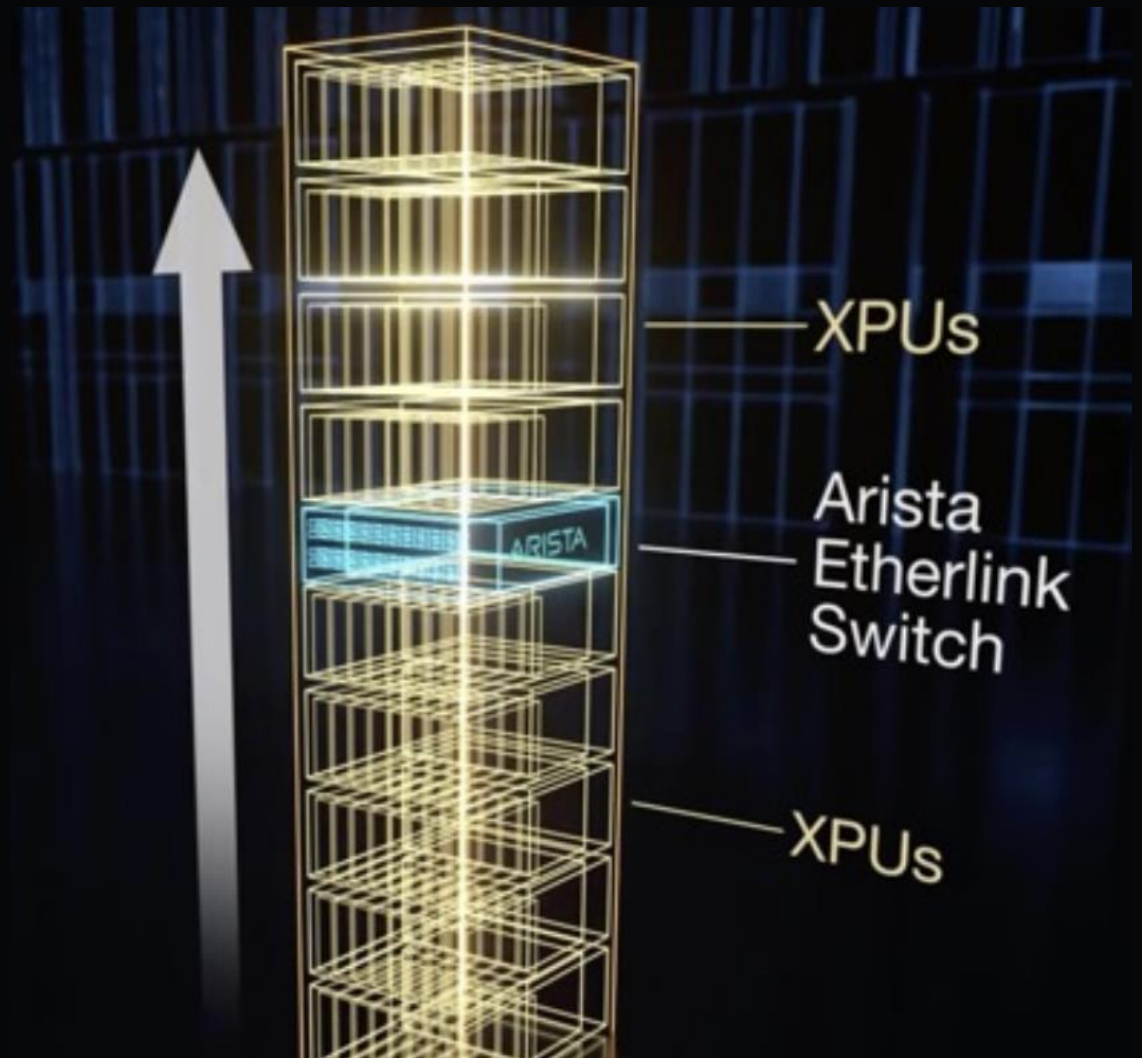

2.3 TB 3D-DRAM memory capacity

7.2 PB/s 3D-DRAM memory bandwidth

d-Matrix Inc © 2026. All Rights Reserved.

Announcing New Collaboration with Arista

Raptor ESUN Racks Under Development

d-Matrix | ARISTA

Arista AI Networking

ESUN system with 128 next-gen Raptor XPUs

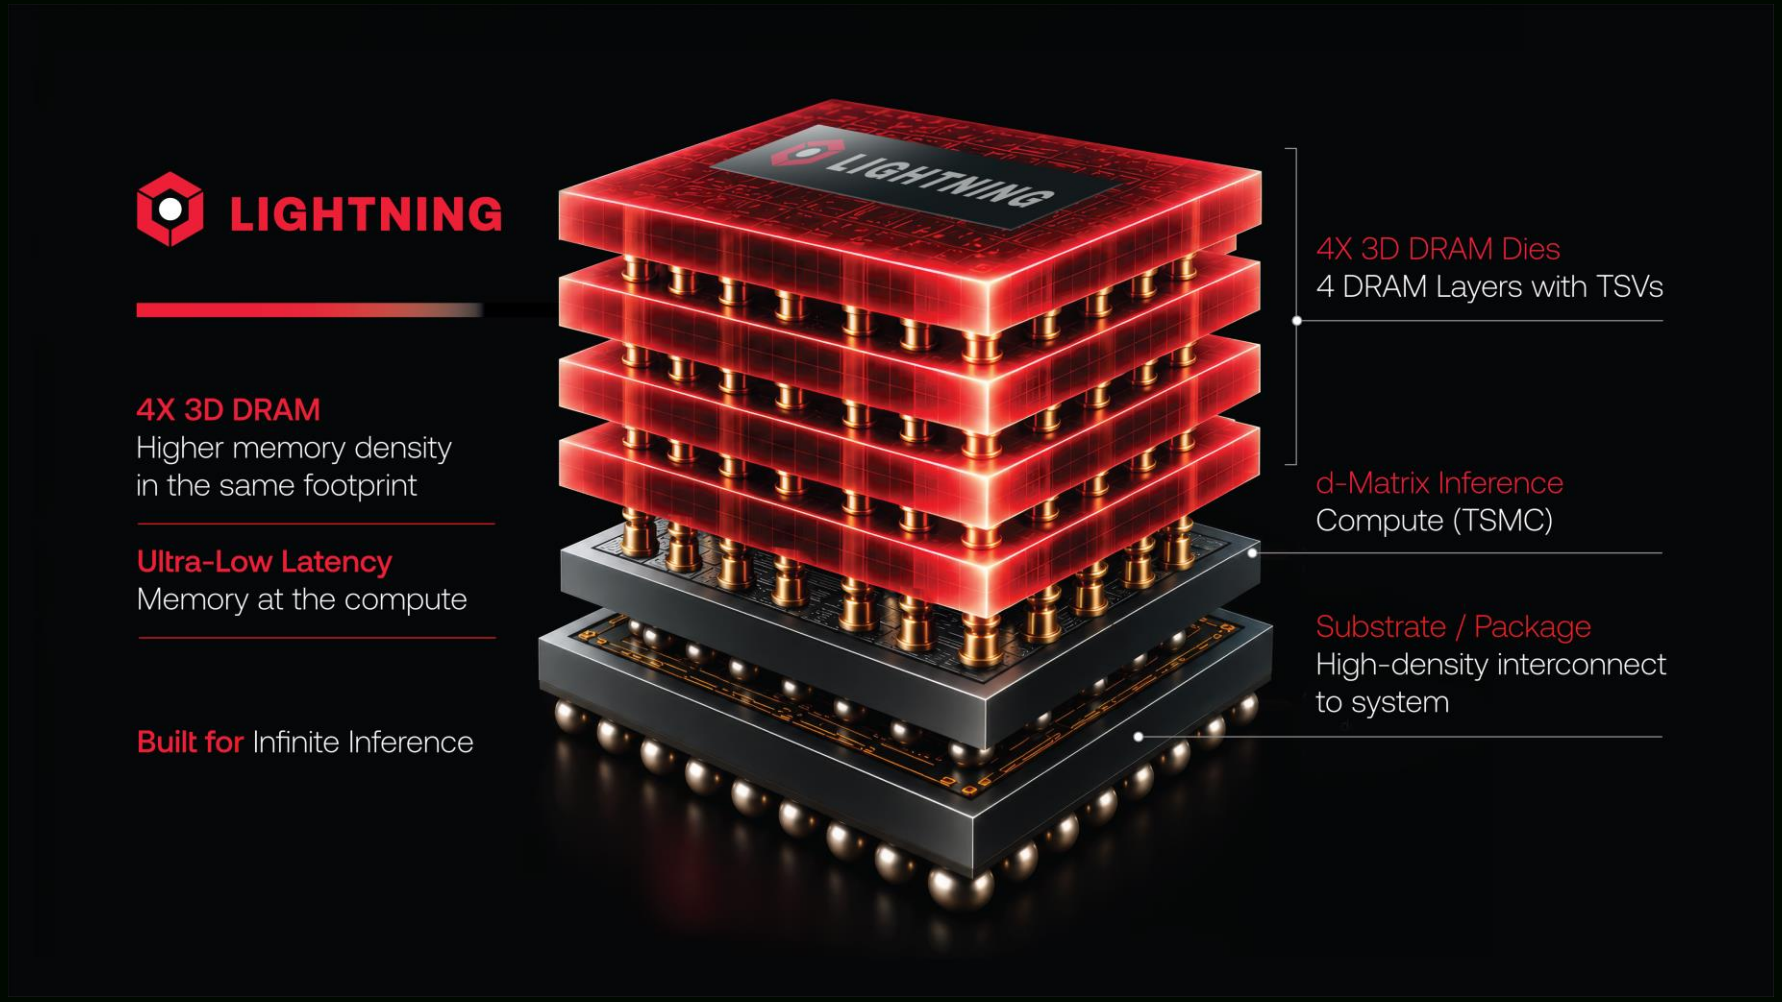

d-Matrix Inc © 2026. All Rights Reserved.

What's the Next Next?

d-Matrix Inc © 2026. All Rights Reserved.

Next-Level Inference Compute

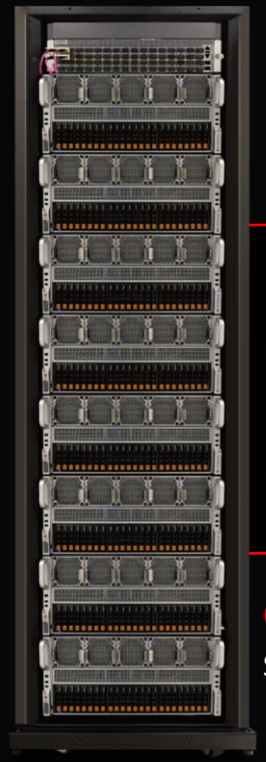

d-Matrix Lightning: 3D Multi-Stacked DRAM Memory

d-Matrix Inc © 2026. All Rights Reserved.

A Rack-Scale Roadmap

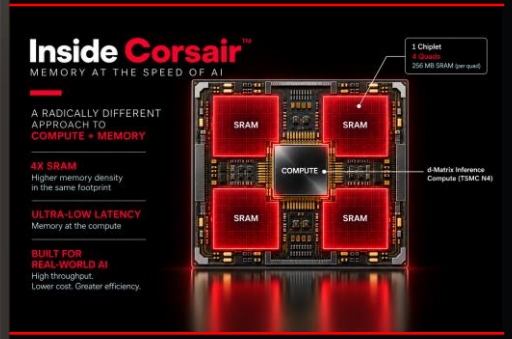

Serving Frontier Class Ultra-Low-Latency Inference

100B

parameter-class models

PCIe Scale-up 8x (Node Scale)

Corsair™

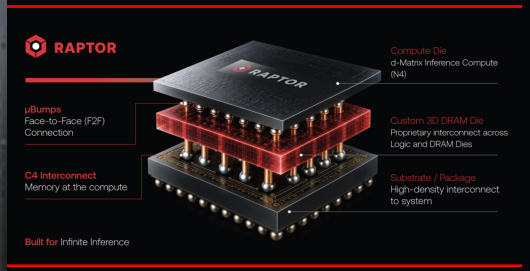

SRAM Inference

3T

parameter-class models

ESUN / NVL144 Scale-up (Rack Scale)

Raptor™

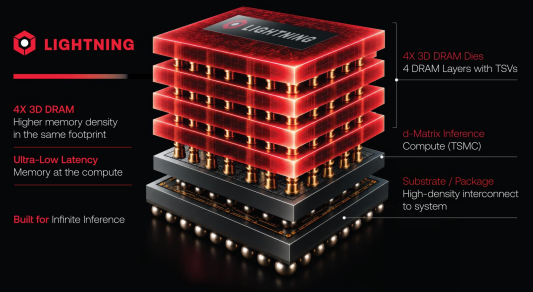

DRAM Stacked Inference

20T

parameter-class models

ESUN / NVL Scale-up (Rack Scale)

Lightning™

Multi-Stacked DRAM Inference

d-Matrix Inc © 2026. All Rights Reserved.

Innovation at Every Level

On the Path to Infinite Inference. No Latency.

Memory-Centric Compute

SRAM, 3D DRAM

Easy access to Supply

6 NM, no HBM, no CoWoS

GPU ROI Extender

Boosts current & past GPU infrastructure

Plugs into Existing Data Centers

Industry standard design

Accelerated Time to Market

Rack-scale, Supermicro, NVIDIA

Highly Versatile

Stands alone & works well with others
