OCP Global Summit 2026

Hyperscale Storage Solutions for NeoClouds

Prathamesh Nalawade · Principal Product Manager

October 13, 2026

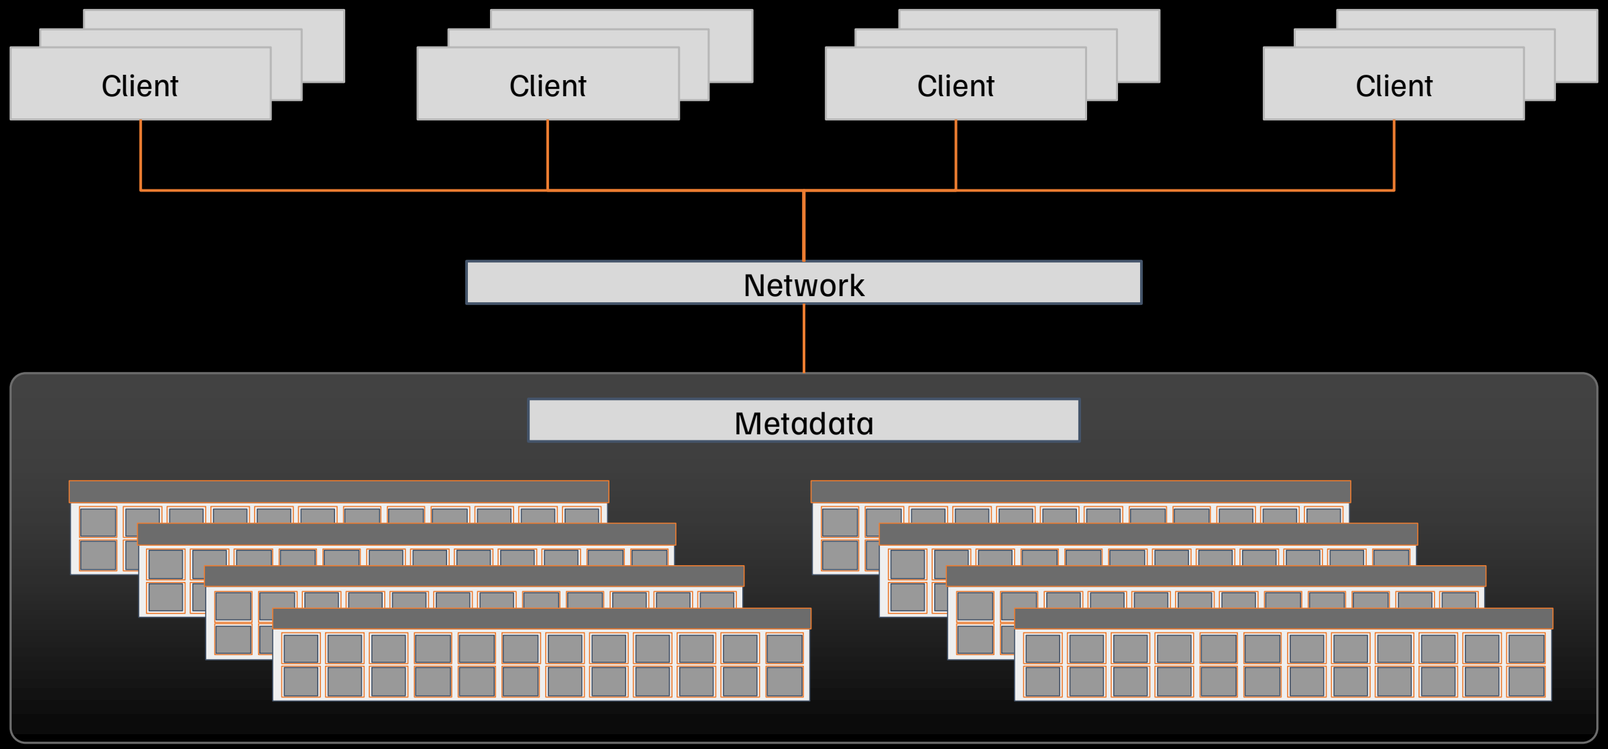

NeoCloud journey from TTM to efficiency

At scale, every percent translates to meaningful dollars

What efficient storage architecture looks like at scale

Scale-Out Storage Cluster

Uniform building blocks are a key element for efficient scaling

A closer look at a typical data node

Flash management at individual drive level limits efficiency

©2026 Everpure

An innovative approach to flash management

Global Flash Management

- Aggregate NAND
- Manage NAND via host-resident DirectFlash software

Increase: Effective Capacity, Resilience

Reduce: Over Provisioning, Write Amplification

Tuned for Specific Workloads

- Maximize performance for multiple I/O patterns
- Configurable: IU Size, Flash Type

DirectFlash® technology maximizes storage efficiency

Accelerate your scale journey with Everpure

EFFICIENCY

+10-20%

storage efficiency

TIME TO VALUE

3-6 months

cut from development cycles

SUPPLY RESILIENCE

Exabyte scale

multi-sourced NAND

Everpure for NeoClouds

FlashBlade //EXA™

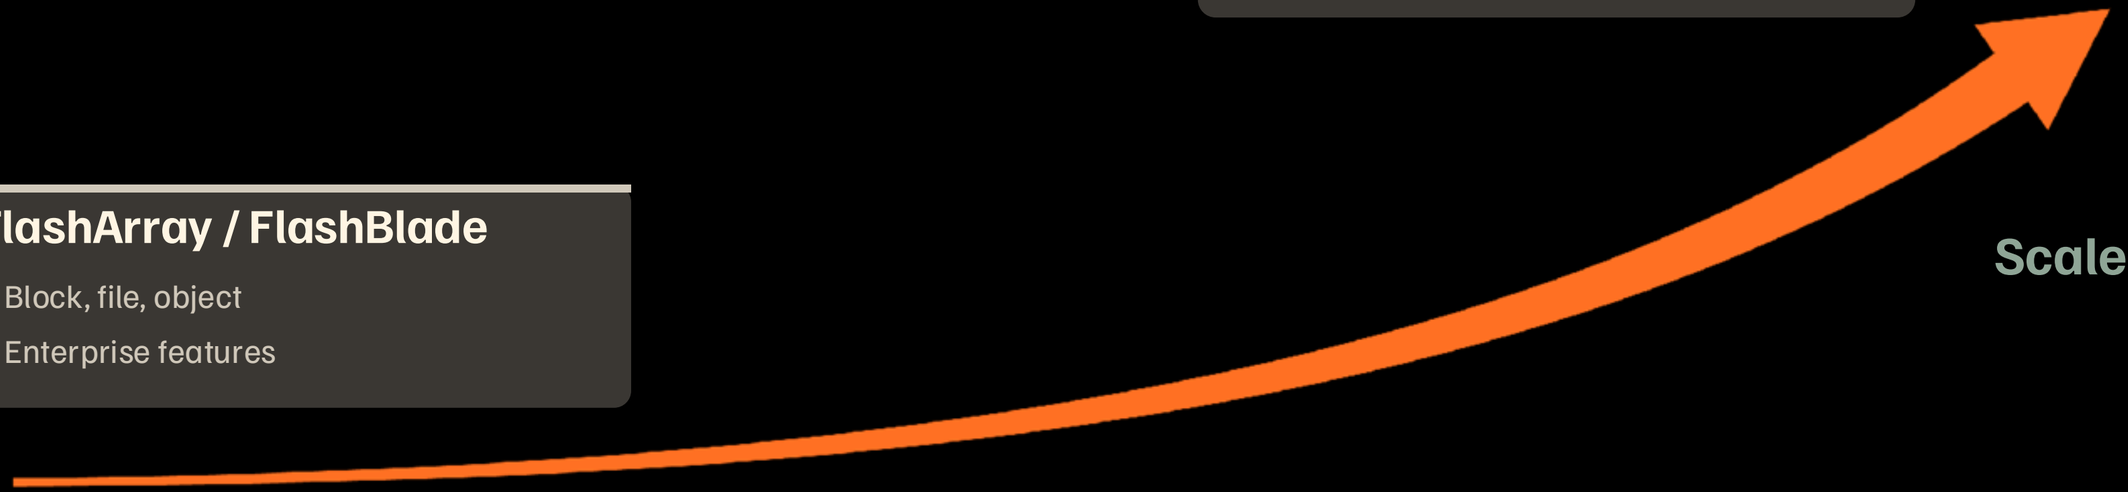

- File, object
- Exabyte scale & performance

Hyperscale Solutions

- Your filesystem / object store
- Exabyte scale & performance

FlashArray / FlashBlade

- Block, file, object
- Enterprise features
