Put Every Prompt in Its Place

Nic Dubé

OCP GLOBAL SUMMIT

October 12-15, 2026
San Jose, California

intel × OPEN Compute Project®

Open Communities

Driving the open foundation for scalable AI

Open hardware

Open software

Open interfaces

Open infrastructure

intel
OPEN Compute Project®
Open Communities
Driving the open foundation for scalable AI
Open hardware
Open software
Open interfaces
Open infrastructure
116
Contributions made to OCP
Intel has been an active contributor and member since its founding in 2011.
33
Sessions at this Global Summit
Across 13 tracks

Today

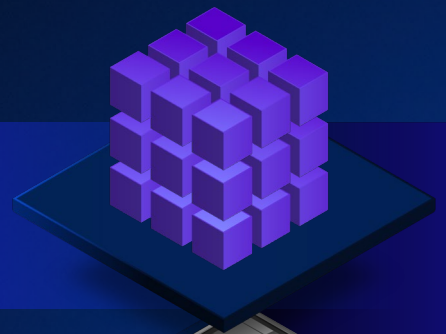

Built for large training clusters

Tomorrow

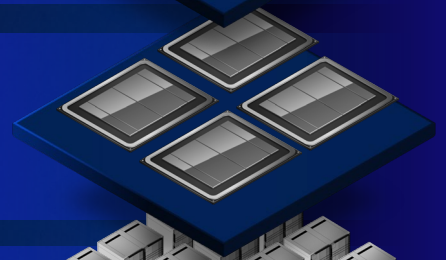

Built for inference everywhere

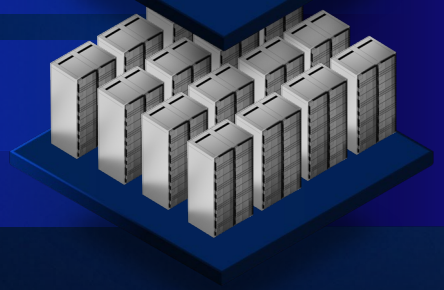

Expanding & diversifying workloads

Monolithic intelligence

Uniform compute

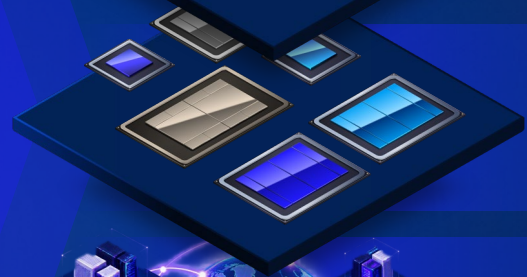

Large scale data centers

Intelligent Routing & Orchestration

Right-sized intelligence

Efficient compute

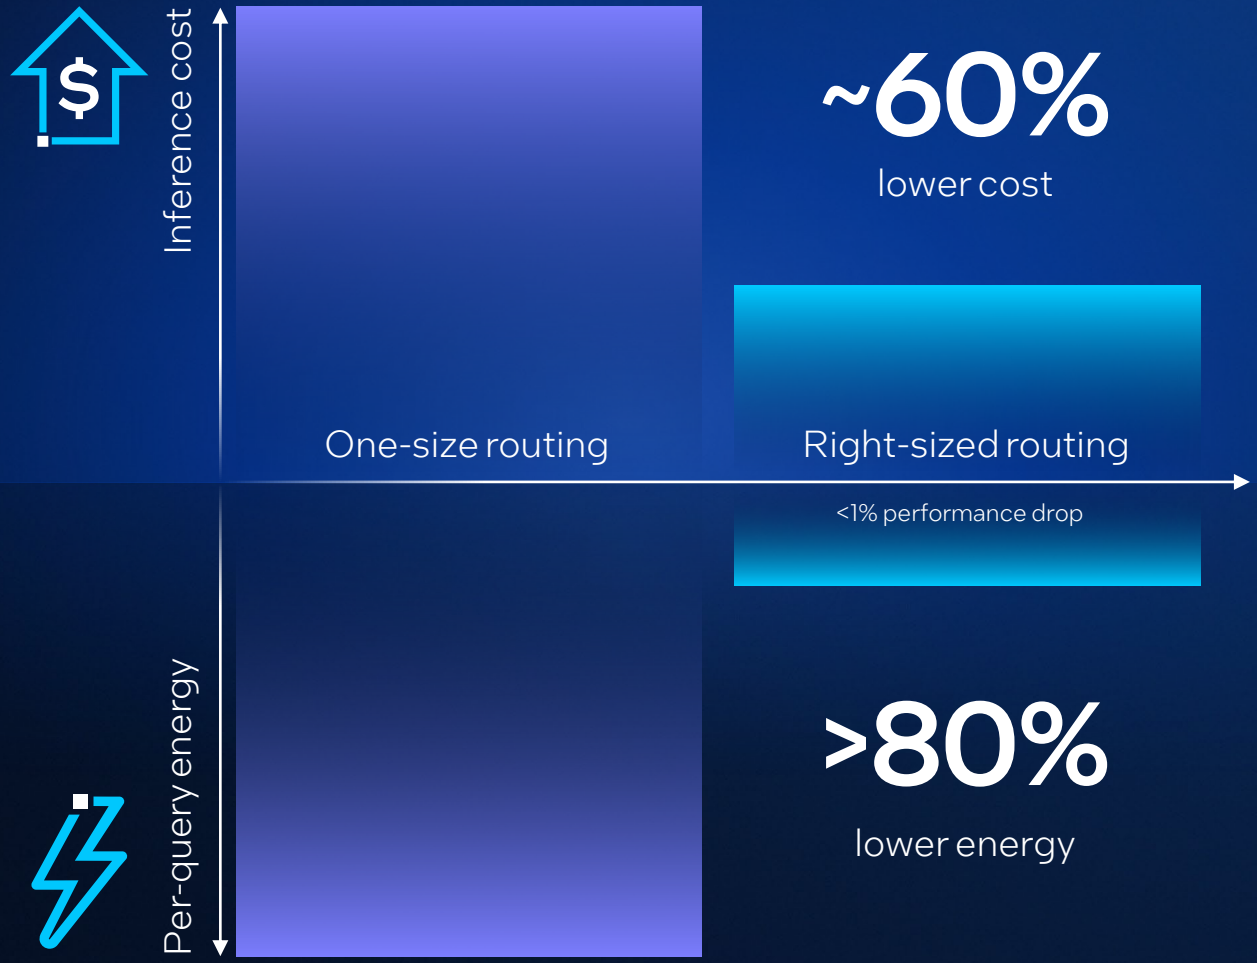

Distributed inference

Right-Sized Intelligence

Reducing cost

Advancing sustainability

Without giving up quality

~60%
lower cost

>80%
lower energy

https://www.callosum.com/blog/programmable-heterogeneity
BEST-Route: Adaptive LLM Routing with Test-Time Optimal Compute (The University of British Columbia)
Right-Sizing the Model to the Question: Cutting AI Chatbot Energy Without Losing Quality (Frits AI)
Energy use of AI inference, efficiency pathways, and test-time scaling (Microsoft)

Open Weight Models Growing in Use

% of Tokens Open vs. Closed Model

Open vs. Closed Token Volume (Vercel)

Today

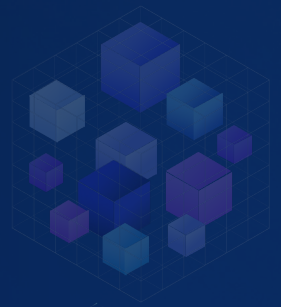

Built for large training clusters

Tomorrow

Built for inference everywhere

Expanding & diversifying workloads

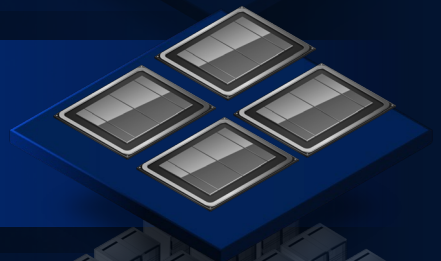

Monolithic intelligence

Right-sized intelligence

Compute For Inference

Uniform compute

Efficient compute

Large scale data centers

Distributed inference

INTEL® GPU D-SERIES
CODENAMED

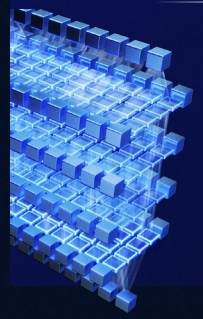

Crescent Island

Compute designed for inference

BUILT FOR AGENTIC AI

1311/2622
TFLOPs
FP8/MxFP4

32
Xe Cores
Xe 3P GPU IP

256
XMX engines

16
deep systolic

Xe Matrix Extensions (XMX)

LARGE CONTEXT CAPACITY

1.5TB/s
Memory bandwidth

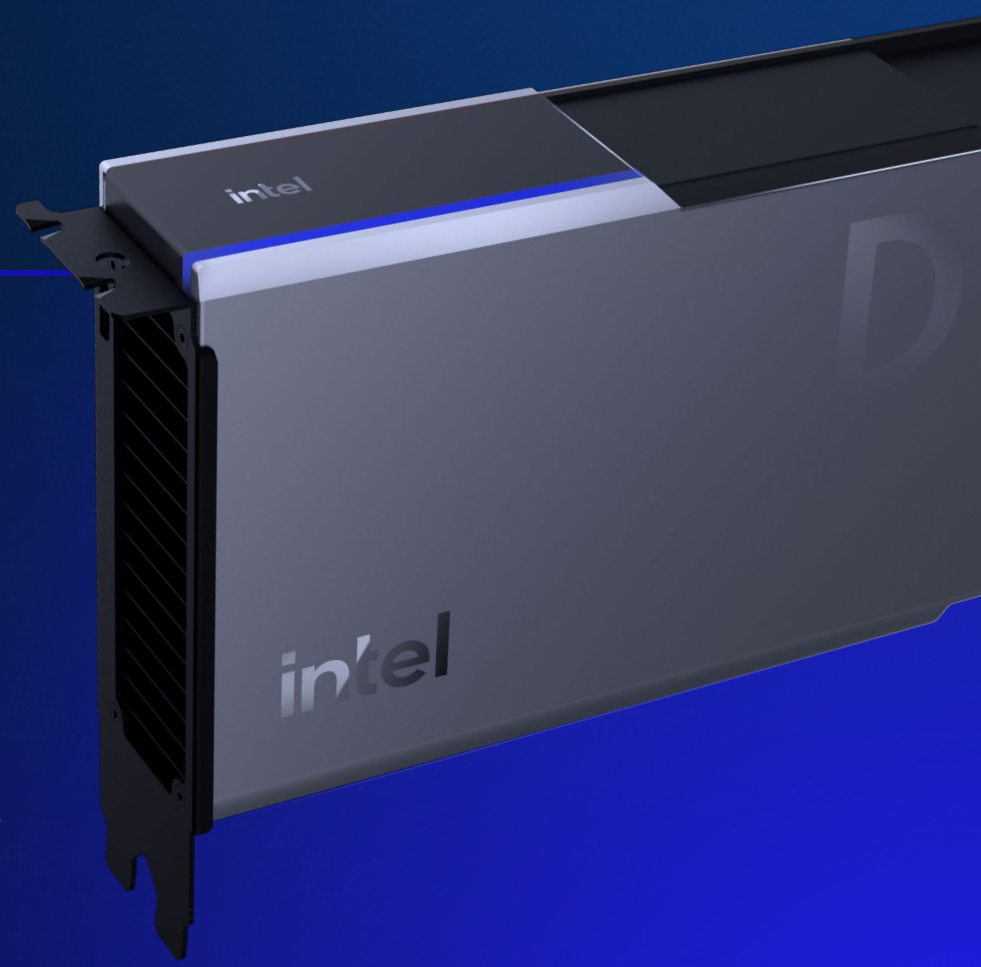

Up to
480GB*
LPDDR5x

LOW-POWER FAMILIAR FORM

350W
Air-cooled PCIe

OPEN SOFTWARE STACK

Day 0
Functionality

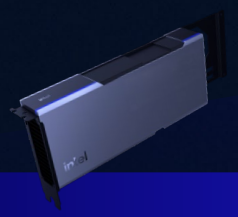

*Intel branded PCIe card has 160GB LPDDR5x; design enables partners to build ODM branded cards with flexible options up to 480GB memory.

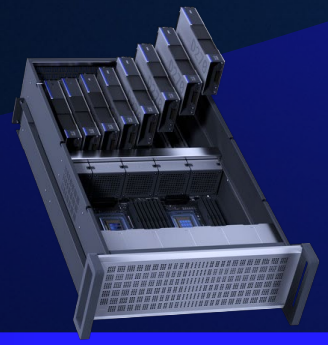

INTEL® GPU D-SERIES CODENAMED

Crescent Island Scalable Performance

Across the full AI model continuum

x1

x8

x80

Throughput

AI Model Continuum

20B	78B	Scout	235B	V4-Flash	-	Maverick	400B	V3-R1	753B	K2, K2.5 & K2.6	Le Chonk	V4 Pro	2.7T	

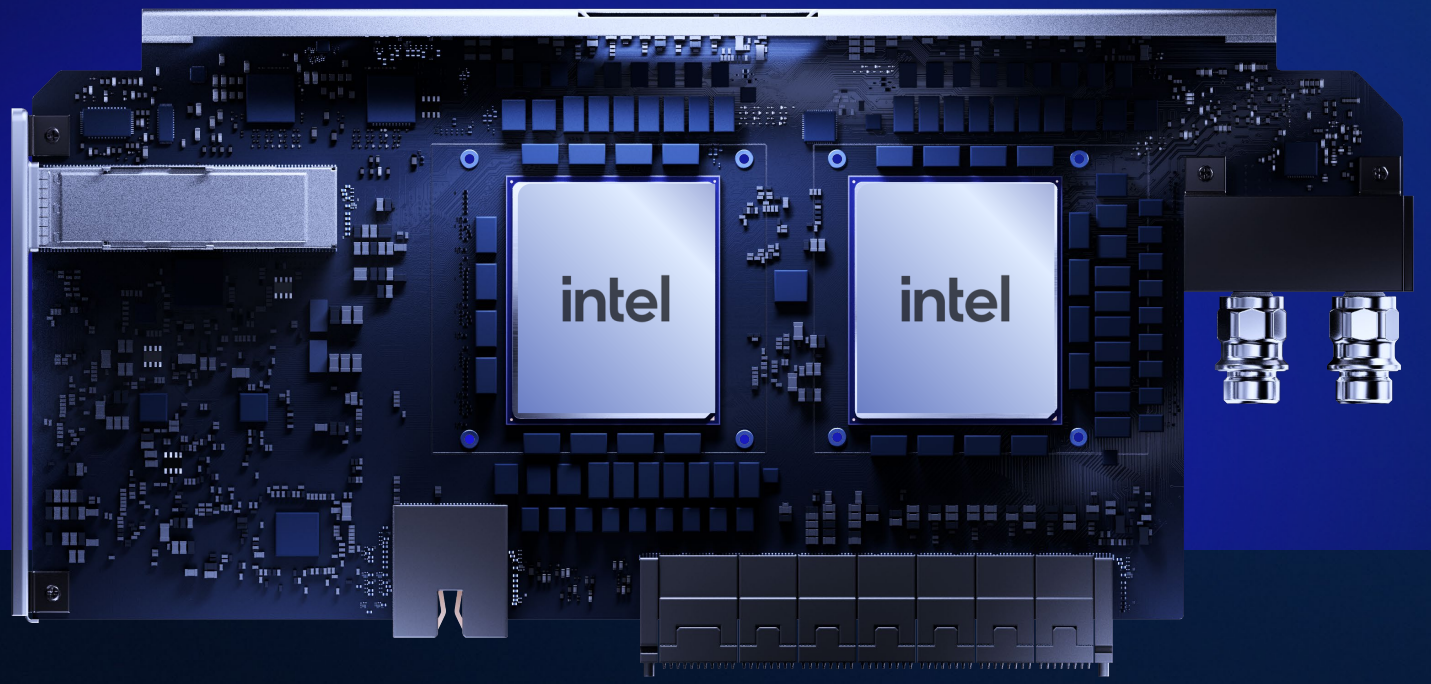

Fast Agents | Multimodal Doc Q&A | Agentic Coding | Knowledge Work | Agentic Workflows | Frontier Reasoning

Routing | High Vol. Chat | Multimodal Reasoning | Agent Swarms | Long Horizon Coding

intel × OPEN Compute Project®

The Open Adapter Card (OAC)

Driving Form Factor Innovation

INTEL® GPU D-SERIES

Growing Ecosystem of Customers and Partners

AI Natives | Appliances | ISV & Software Ecosystem | Neo Clouds | OxMs

Includes several OCP members

OPEN Compute Project®

Today

Built for large training clusters

Tomorrow

Built for inference everywhere

Expanding & diversifying workloads

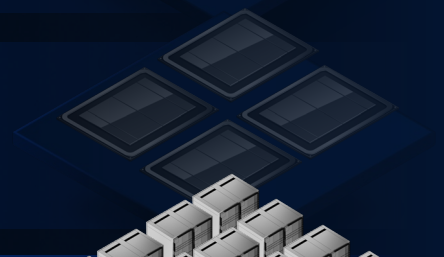

Monolithic intelligence

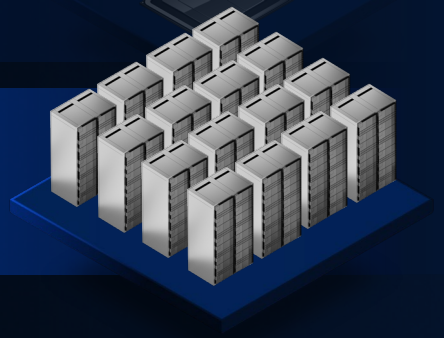

Right-sized intelligence

Uniform compute

Efficient compute

Large scale data centers

Inference Everywhere

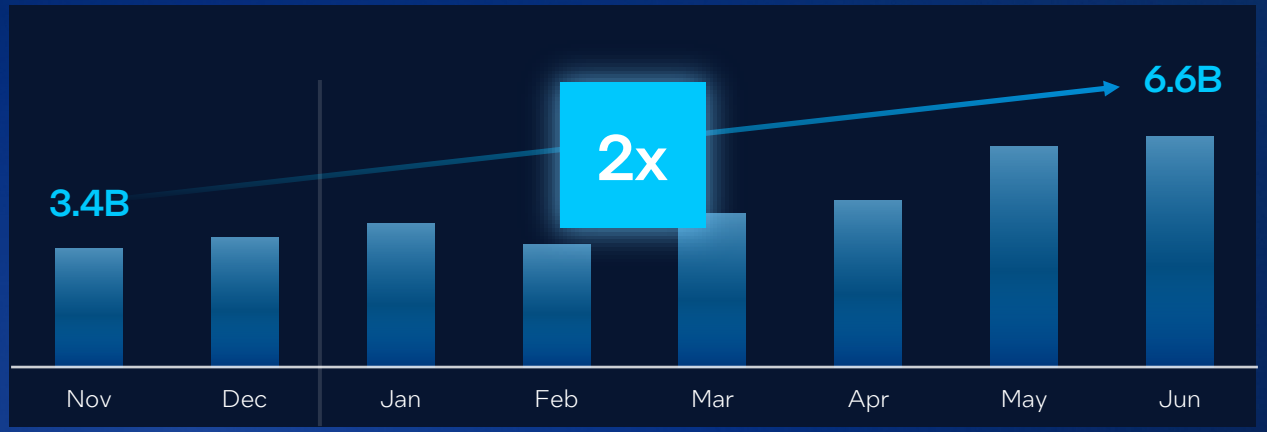

Distributed inference

Agents Are on the Rise

Triple the number of agents per enterprise within a year

Doubling of total agent requests per month within half a year

The AI Traffic Report Q2 2026: Agentic Traffic Surged 45%, With Meta Taking the Lead (DataDome)

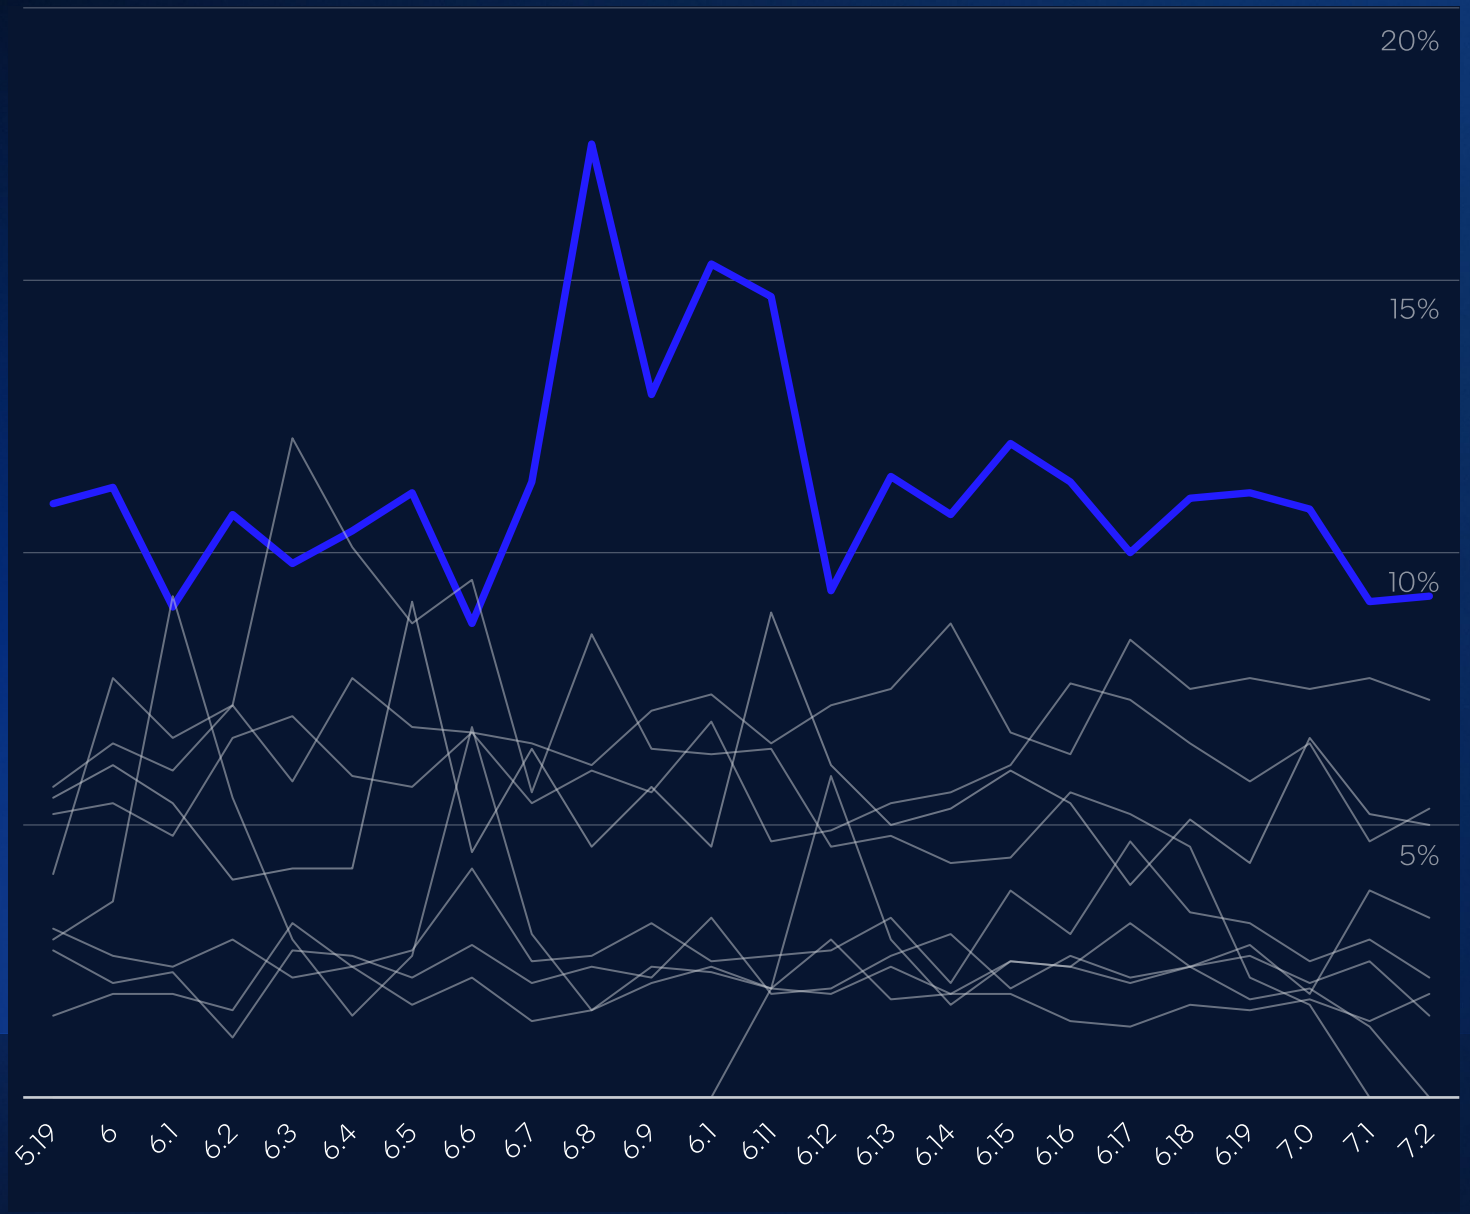

Salesforce Agentic Enterprise Index Second Edition (SalesForce)

Agents That Just Run

Open hardware through OCP

Open software through Linux

Intel a founding member of both

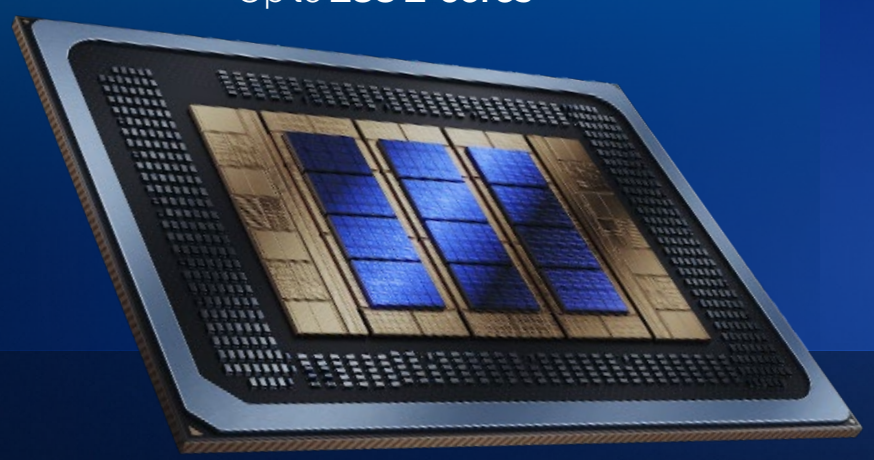

Intel® Xeon® CPUs for Agentic AI

Intel® Xeon® 6+

Dense cores for throughput & efficiency

Up to **288 E-cores**

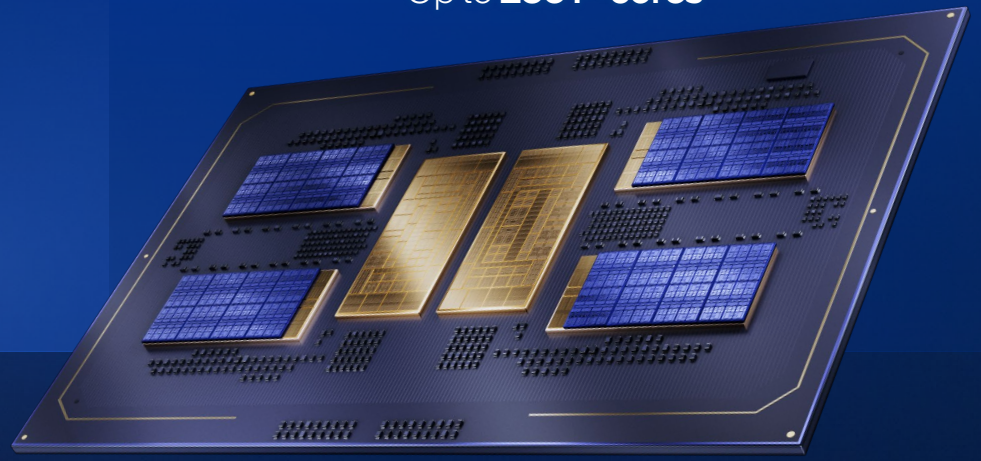

NEXT GEN INTEL® XEON® CODENAMED

Diamond Rapids

Best single-thread performance

Up to **256 P-cores**

Dense Intel® CPU Racks, a Proven Systems Heritage

2008

Sun Blade 6048

192
CPUs / rack

768
cores / rack

X6275
Xeon X5570

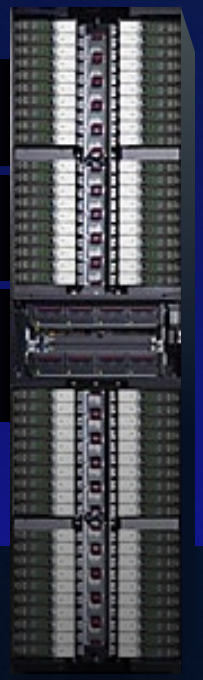

2014

HPE Apollo 8000

288
CPUs / rack

5,184
cores / rack

XL730f Gen9
Xeon E5-2699 v3

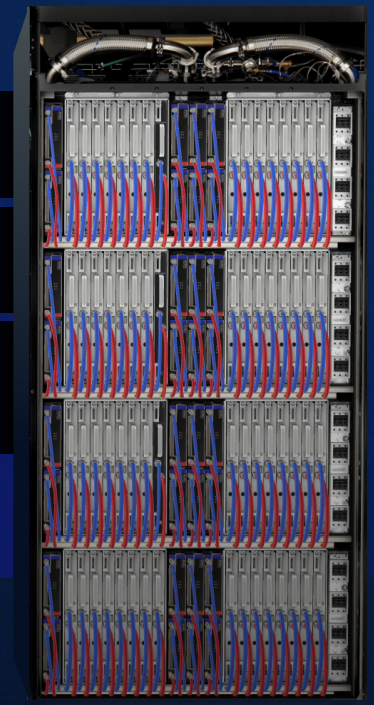

2023

HPE Cray EX

512
CPUs / rack

28,672
cores / rack

EX420 / EX4000
Xeon Max 9480

Intel® Xeon®: Agentic AI Rack Ecosystem

Faster, safer, more predictable, and ready for your workload

ASRock Rack

ORv3 OCP

ASUS

GIGABYTE™

MiTAC Computing

ORv3 OCP

msi

SUPERMICRO

ORv3 OCP

Partners with solutions available today

intel

The Right Tool for the Job

Orchestration
Intel® Xeon® CPU

- Classify workload
- Route requests
- Coordinate resources

Batch workload

Fast token workload

Token Generation
Scale for throughput

Intel® GPU D-series

Token Generation
Scale for low latency

Intel® GPU D-series (Prefill)
SambaNova RDU (Decode)

Agent loop

Execute
Intel® Xeon® CPU

- CPU-native operations
- Assemble response
- Return to application

One more thing...

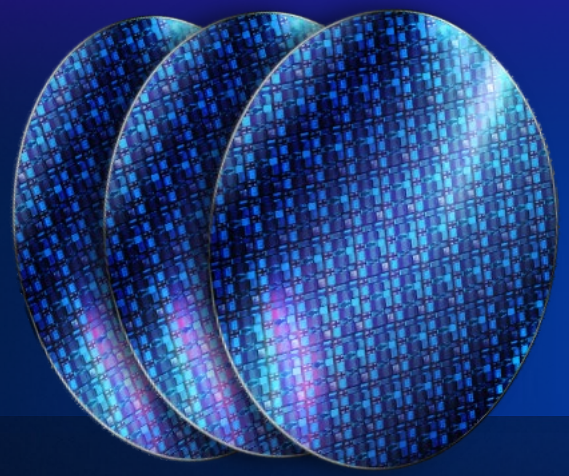

Silicon Photonics for Next Gen System Architecture

Partnering with pioneers to accelerate solutions at ecosystem scale

CAPACITY & SCALABILITY

InP on 300mm Silicon

Delivering at High Volume

INTEGRATION & RELIABILITY

Integrated Lasers

Proven at scale, key enabler for NPO

UNIQUELY POSITIONED TO ENABLE

High Bandwidth Design

Necessary for the next generation of AI

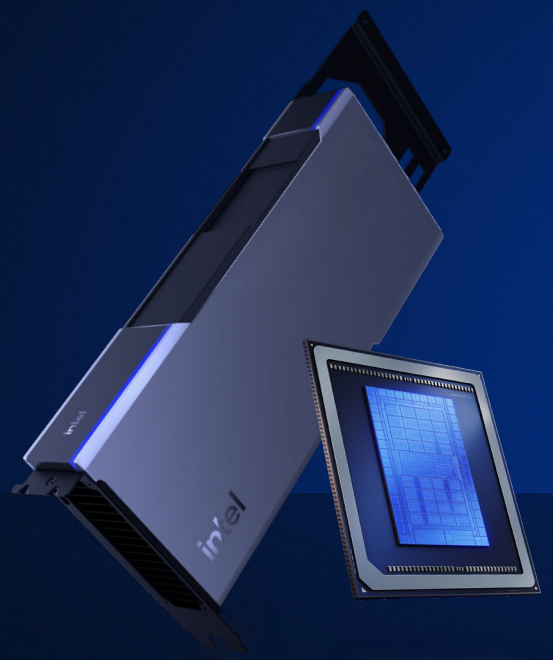

Put Every Prompt in Its Place

Intel® GPU D-Series

GPU, CPU and RDU based

for AI at Scale

intel
OPEN Compute Project®
Building the Open for Enterprise AI
On display at 2026 OCP Global Summit
Dense compute for agentic AI inference
Agentic AI
High-density inference
