

Storage Track Introduction

Ross Stenfort, OCP Storage Project Lead

Agenda (1 of 3)

8:00-8:15	Introduction	Ross Stenfort, Sandisk
8:20-8:40	Testing for OCP Datacenter SSD	Tim Sharp, Microsoft Nick Kricky, Teledyne LeCroy Rick Walsh, SanBlaze
8:45-9:05	SFF Updates	Anthony Constantine, Micron
9:10-9:30	QLC in Hyperscale Fleet	Vineet Parekh, Meta Joseph Cirnigliaro, Meta
BREAK		
9:45-10:00	Near-Line SSD: the Path to the Future	David Palmer, Micron Steve Hetzler, Micron
10:05-10:20	QLC Write the end of SLC Caching	Stephen Gold, Sandisk
10:25-10:40	Optimizing SSD Performance Testing using Flexible IO Sprandom	Vincent Fu, Samsung Dan Helmick, Samsung

Agenda (2 of 3)

10:45-11:10	High Capacity QLC Innovation	Rory Bolt, Kioxia Yang Liu, ScaleFlux Sebastien Jean, Phison Mark Dancho, Sandisk
11:15-11:30	NVMe State of the Union	Chris Sabol, Google Ross Stenfort, Sandisk
11:30-12:30	Lunch	
12:30-12:50	IO Prioritization for Optimized Command Handling	Yuliya Tarnikova, Google Dan Helmick, Samsung Chaitanya Kulkarni, Nvidia Anthony Constantine, Micron
12:55-1:10	Recent Advancements in OCP Telemetry for SSDs	Kevin Brandt, Micron Dhankaran Singh Ajavat, Meta
1:15-1:35	The Open Flash Platform: Serverless Exabyte-Scale Flash Storage	Gary Grinder, Los Alamos Labs Floyd Christofferson, Hammerspace Ted Weatherford, Xsight Labs Jillian Kaplan, Xsight Labs

Agenda (3 of 3)

1:40-1:55	Vertical Optimizations for KV$ Infrastructure	Dongjoo Seo, Samsung Javier Gonzalez, Samsung
2:00-2:15	Increasing Block Sizing Changes Data Placement Economics	Mike James, Sandisk
2:15-3:15	Break	
3:15-3:55	Update on Storage Specs and What Customers Care About	David Black, Dell Technologies Timothy Sharp, Microsoft Vineet Parekh, Meta Chris Sabol, Google Jeff Wolford, HPE Moderator: Ross Stenfort, Sandisk
4:00-4:15	Adopting high-capacity HDDs- navigating throughput and IOPS Limits using SAS/NVME interfaces for the AI Cloud	Hariharan Kumar, Microsoft Balaji Natrajan, Microsoft
4:20-4:35	Storage as a Performance Tier for LLM Serving	Don Moon, SK Hynix Joohee Lee, SK Hynix
4:40-4:55	Storage Close	Ross Stenfort, Sandisk

OCP Storage Roadmap of Success

2024	Meta and Google Open-Source SSD Test Cases	Available	OCP Test Framework (Meta), OCP Storage Test Cases (Meta), ocp-diag-ssd-qual (Google)
	OCP Storage Tech Talk	[virtual]	May 2024
	EDSFF SSD Reference Design	[spec]	ScaleFlux PCIe Gen 5 EDSFF NVMe SSD Reference Design
	Datacenter NVMe® SSD rev. 2.6	[spec]	Dell, Google, HPE, Meta, Microsoft
	L.O.C.K. rev. 0.5	[spec]	Google, Kioxia, Microsoft, Samsung, Solidigm
	HDD Dynamics Common Language and Tools Phase 2	[link]	Dell, IEIT Systems, Lenovo, Seagate, WD, ZT Systems
	HDD Dynamics Combined Acoustic & Vibration Surrogate	[white paper]	Dell, IEIT Systems, Lenovo, Seagate, WD, ZT Systems
2025	OCP Marketplace (Products/Storage)	[link]	20+ SSDs and 5 SSD Testing Services
	Datacenter SAS-SATA Device rev. 1.5	[spec]	HPE, Dell, Meta, Microsoft
	Datacenter NVMe SSD rev. 2.7	[spec]	Dell, Google, HPE, Meta, Microsoft
	L.O.C.K. rev. 0.8	[spec]	Google, Kioxia, Microsoft, Samsung, Solidigm
	Jabil Endurance Storage System	[spec]	Jabil
	OCP Storage Tech Talk	[virtual]	May 2025
2026	OCP Storage Tech Talk	[virtual]	May 2026
	Datacenter NVMe SSD rev. 2.8		Coming soon

OCP Storage Tech Talk

2026 Event Recording

- Virtual Only Storage Event
  - Event Date: Month of May each year
  - 2026 Statistics
    - 22 Talks, 31 Speakers, 14 Companies
    - 4 Hours of Technical Topics
    - 500+ Attended Live
    - 8 Sponsors
  - Example Topics:
    - SNIA/SFF Update, Linux I/O Updates, OCP L.O.C.K Update
    - Hyperscale Challenges, Telemetry

- Next year….
  - Sign up even if you can’t attend to get the recording

OCP Storage Participation Opportunities

- Sign Up on OCP Storage email reflector
  - OCP Storage Event and other opportunities will come across the reflector
- Present Ideas in Monthly Meetings
  - For more information reach out to:
    Ross Stenfort, Sandisk
- Generate Contributions to OCP

OCP Storage Project Main Page

OCP Feedback CLA Process

- Enables:
  - Feedback on specifications before contribution from non-authors
  - It is at the authors discretion on how to use the feedback

- Interesting Workstreams:
  - Datacenter NVMe SSD Specification
    - There are 20+ companies participating in this process today for Datacenter NVMe SSD Specification
  - Datacenter SAS/SATA Specification
  - High Bandwidth Flash (HBF)

- How to get involved?
  - See Semi-Private Workstreams on the OCP Website and fill out the form.
  - QR Code will take you to website.

Event Logistics

- Be present for the great content and engage
  - Q/A will be based on available time
- Recording will be available after the event
- ~5 minute breaks between talks, as required by OCP

Thank You!
