The Open Flash Platform: Serverless Exabyte-Scale Flash Storage

Floyd Christofferson

VP Product Marketing, Hammerspace

Gary Grider

Leader of HPC Division, Los Alamos National Laboratory

Ted Weatherford

VP Business Development, Xsight Labs

Jillian Kaplan

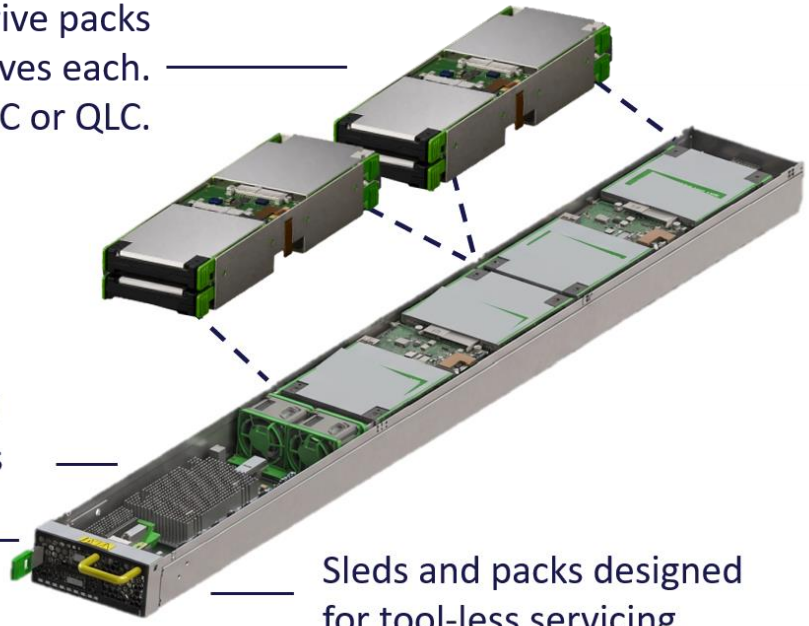

Senior Director, Product + Marketing, Xsight Labs

Open Flash Platform (OFP) Design

OPEN FLASH PLATFORM

Open Flash Platform Sled

- 8 SSDs per sled
- 64 ARM Core DPU
- 2x 400GbE ports
- Up to 1.97 PB*

Open Flash Platform Tray (OCP Rack-Compatible)

- 1RU, OCP rack width
- Up to 6 OFP sleds, 48 SSDs
- 12x 400GbE ports
- Up to 11.8 PB*

Raw capacity using 245.76 TB QLC SSDs

The Future of AI Data Storage is OPEN

- **A new approach to flash storage:** DPU-based, Linux-based, and built for open infrastructure
- **Eliminate the traditional storage server** to improve density, efficiency, and scalability
- **Help define the OCP compatible design** through the Open Flash Platform Initiative
- **Join us.** Scan the QR codes below to learn more and get involved
